The Alphabet Soup of Television Program Ratings Bradley S. Greenberg, Lynn Ann Rampoldi Hnilo, Dana Mastro, 2001

This volume contains the responses of thousands of parents and young people to the age based and content based television ratings. It reports on the analyses of ratings from several thousand television shows. It identifies the process by which these ratings came into being and compares them with parallel content rating systems in other countries. In addition to examining related experimental studies, also included are interviews with a chief rater at a broadcast network and a member of the national ratings oversight body.

**The Rating System** Ethan Parker, AI, 2025-02-24. The Rating System explores the intricate world of motion picture ratings, examining how these classifications shape audience choices and impact the film industry. It delves into the evolution of rating systems, revealing how social and cultural values influence content regulation. Did you know that the criteria raters use include assessments of violence, language, and sexual content, balanced against artistic expression? The book uncovers the decision-making processes and the consequences of extreme ratings for filmmakers and viewers. The book begins by introducing film ratings and their purpose, then traces their historical development from censorship boards to age-based classifications. Chapters detail the contemporary rating process, the criteria used, and the appeals process. It highlights how ratings can shape public discourse and influence creative choices, also noting the consideration of community standards and commercial interests. Understanding the rating system can lead to more informed perspectives on the films we consume and the messages they convey.

During his tenure, the nation's attitudes changed drastically as did the content shown on American airwaves. Controversies arose about TV's influence on children, its portrayal of violence, and its introduction of once-taboo subjects.
