## Television And Politics:

**Television and Politics** , One question the authors address Do network projections based on increasingly sophisticated techniques for calling election outcomes well before polls close affect results At no time has this question been more in the forefront of public consciousness than in the wake of the 2000 presidential election The Langs draw on their own highly detailed study of voter reactions to election news to assess its effect on turnout on political attitudes on candidate strategies and on legislative initiatives As a model of how to study communication effects this highly readable volume will interest decision makers and analysts as well as students of journalism broadcasting political behavior and voters looking ahead to the next election BOOK JACKET Television and Politics ,2017 The authors have analyzed the television problem brilliantly They had come up with a whole set of new insights and their backup research always is fascinating to read Saturday Review A cautious research based book hopefully it will set a trend Ithiel de Sola Pool Public Opinion Quarterly After more than forty years of studying its political implications Kurt and Gladys Lang put the power of television into a unique perspective Through carefully compiled case studies they reveal surprising truths about TV's effect on American political life and explode some popular myths Their theme throughout is that television gives the viewer the illusion of being a favored spectator at some event he sees for himself in other words But in fact it conveys a reality different from that experienced by an eyewitness Because the televised version of an event reaches more people it has greater impact on the public memory and comes to overshadow what actually happened The Langs tell in detail how television shapes events how public figures and political institutions adjust their tactics to exploit the effects they and millions of viewers think television has They examine such issues as whether or not network television projections influence election results They consider the accuracy of the networks increasingly sophisticated techniques for calling election outcomes well before polls close Such concerns have never been more at the forefront of the public consciousness than in the wake of the 2000 presidential election The Langs assess the research to date and clarify the effects of early TV projections on voter turnout and election outcomes and look at the implications for our system of government A model of excellent policy analysis this highly readable volume will interest decision makers and analysts as well as students of journalism broadcasting political behavior and voters looking forward to the next election Kurt Lang was a professor of sociology and political science at Stony Brook before becoming the Director of the School of Communications at the University of Washington Gladys Engel Lang is a professor of communications with joint appointments in Political Science and Sociology at the University of Washington In addition to Television and Politics the Langs have also co authored The Battle for Public Opinion the President the Press and the Polls during Watergate Voting and Nonvoting and Collective Dynamics Provided by publisher *Television in Politics* Jay G. All in the Family The author also focuses on more contemporary American television drawing a comparative analysis between the referential postmodernism of The Simpsons and the confrontational absurdity of South Park

Television and Politics in Evolving European Democracies Lynda Lee Kaid, 1999 Throughout the world television has become an important part of the way in which political candidates and parties present their messages to voters during election campaigns This is particularly true in campaigns at the national level where voters have little personal contact with candidates and must rely on experiencing candidates through the media Despite the importance of the media for voter government interaction however many new reform governments in the post communist era in Eastern European countries failed to appreciate the
