Wober,2013-06-19 A critical review of the harms and benefits of television that also examines systems for maximizing television s benefits The author breaks away from the conventional jargon of audience measurement and other traditional research methods proposing instead new and alternative European and Australian methods of evaluating programming Typical characterizations of the television screen broadly defined to include television home video movies games programs and computers as either the root of all social ills or the potential savior of society are reexamined Wober s ultimately optimistic viewpoint seeks to trigger change in the way we think about and assess television and in turn ensure that screens will serve rather than take advantage of their users Originally published in 1988 this thinking piece concerns timeless issues still of import     A Social History of the Media Asa Briggs,Peter Burke,2018-07-26 Written by two leading social and cultural historians the first two editions of A Social History of the Media became classic textbooks providing a masterful overview of communication media and of the social and cultural contexts within which they emerged and evolved over time This third edition has been thoroughly revised to bring the text up to date with the very latest developments in the field Increased space is given to the exciting media developments of the early 21st Century including in particular the rise of social and participatory media and the globalization of media Additionally new and important research is incorporated into the classic material exploring the continuing importance of oral and manuscript communication the rise of print and the relationship between physical transportation and social communication Avoiding technological determinism and rejecting assumptions of straightforward evolutionary progress this book brings out the rich and varied histories of communication media In an age of fast paced media developments a thorough understanding of media history is more important than ever and this text will continue to be the first choice for students and scholars across the world     **Television and Social Behavior** John P. Murray,Eli Abraham Rubinstein,George A. Comstock,1972     **Impacts of the Knowledge Society on Economic and Social Growth in Africa** Amoah, Lloyd G. Adu,2014-03-31 In a world that is essentially digitizing some have argued that the idea of the knowledge society holds the greatest promise for Africa s rapid socio economic transformation Impacts of the Knowledge Society on Economic and Social Growth in Africa aims to catalyze thinking and provide relevant information on the complex ways in which the information age is shaping Africa and the implications that this will have for the continent and the world This premier reference volume will provide policy analysts policymakers academics and researchers with fresh insights into the key empirical and theoretical matters framing Africa s ongoing digitization     Social Forces in the Re-Making of Cross-Strait Relations André Beckershoff,2023-08-11 Adopting a critical political economy perspective this book sheds new light on the social and political struggles that shaped the political dynamics of Taiwan China relations and cross Strait rapprochement between 2008 and 2014 Presenting a careful analysis of primary sources and interviews the book reconstructs the historical political and socio economic factors that shaped Taiwan s path to the Sunflower Movement of 2014 reinterpreting this process as a struggle over Taiwan s role in the global economy It challenges received wisdoms

regarding the rise and fall of the rapprochement First the study argues that the rapprochement was not primarily driven by political elites but by capitalist conglomerates within Taiwan which sought a normalisation of economic relations across the Taiwan Strait Second it finds that Taiwan s social movements during that period were not homogeneous but rather struggled to find a common vision that could unite the critics of the rapprochement The insights provided not only offer a deeper understanding of Taiwan s protest cycle between 2008 and 2014 but also serve to recontextualise the political dynamics in post Sunflower Taiwan As such it will appeal to students and scholars of Taiwan Studies East Asian Politics and Social Movement Studies

Television And The Crisis Of Democracy Douglas Kellner, 2018-02-02 This is one of the best books I've read on the changing relationship of television to society It provides a very good analysis of theoretical perspectives on television and makes excellent use of critical theory An accessible book that at the same time challenges the reader to think more deeply about the role of television in a formally democratic society

Vincent Mosco Carleton University In this pathbreaking study Douglas Kellner offers the most systematic critically informed political and institutional study of television yet published in the United States Focusing on the relationships among television the state and business he traces the history of television broadcasting emphasizing its socioeconomic impact and its growing political power Throughout Kellner evaluates the contradictory influence of television a medium that has clearly served the interests of the powerful but has also dramatized conflicts within society and has on occasion led to valuable social criticism

Make Room for TV Lynn Spigel, 2013-11-26 Between 1948 and 1955 nearly two thirds of all American families bought a television set and a revolution in social life and popular culture was launched In this fascinating book Lynn Spigel chronicles the enormous impact of television in the formative years of the new medium how over the course of a single decade television became an intimate part of everyday life What did Americans expect from it What effects did the new daily ritual of watching television have on children Was television welcomed as an unprecedented window on the world or as a one eyed monster that would disrupt households and corrupt children Drawing on an ambitious array of unconventional sources from sitcom scripts to articles and advertisements in women's magazines Spigel offers the fullest available account of the popular response to television in the postwar years She chronicles the role of television as a focus for evolving debates on issues ranging from the ideal of the perfect family and changes in women's role within the household to new uses of domestic space The arrival of television did more than turn the living room into a private theater it offered a national stage on which to play out and resolve conflicts about the way Americans should live Spigel chronicles this lively and contentious debate as it took place in the popular media Of particular interest is her treatment of the way in which the phenomenon of television itself was constantly deliberated from how programs should be watched to where the set was placed to whether Mom Dad or kids should control the dial

Make Room for TV combines a powerful analysis of the growth of electronic culture with a nuanced social history of family life in postwar America offering a provocative glimpse of the way television became the mirror of so many of America's hopes and fears and dreams
