Television Audience:

Television and Its Audience Patrick Barwise, Andrew Ehrenberg, 1988-11-24 This book by two leading experts takes a fresh look at the nature of television starting from an audience perspective It draws on over twenty years of research about the audience in the United States and Britain and about the many ways in which television is funded and organized around the world The overall picture which emerges is of a medium which is watched for several hours a day but usually at only a low level of involvement an audience which views mainly for relaxation but which actively chooses favourite programmes a flowering of new channels but with no fundamental change in what or how people watch programmes costing millions to produce but only a few pennies to view a wide range of programme types apparently similar to the range of print media but with nothing like the same degree of audience segmentation a global communication medium of dazzling scale speed and impact but which is slow at conveying complex information and perhaps less powerful than generally assumed The book is packed with information and insights yet is highly readable It is unique in relating so many of the issues raised by television to how we watch it There is also a highly regarded appendix on advertising as well as technical notes a glossary and references for further reading
