The Anarchical Society Hedley Bull, 1977 The Anarchical Society is one of the masterworks of political science and the classic text on the nature of order in world politics Originally published in 1977 it continues to define and shape the discipline of international relations This edition has been updated with a new interpretive foreword by Andrew Hurrell

Beyond the Anarchical Society Edward Keene, 2002-07-11 Edward Keene argues that the conventional idea of an anarchical society of equal and independent sovereign states is an inadequate description of order in modern world politics International political and legal order has always been dedicated to two distinct goals to try to promote the toleration of different ways of life while advocating the adoption of one specific way that it labels civilization The nineteenth century solution to this contradiction was to restrict the promotion of civilization to the world beyond Europe That discriminatory way of thinking has now broken down with the result that a single global order is supposed to apply to everyone but opinion is still very much divided as to what the ultimate purpose of this global order should be and how its political and legal structure should be organised *Remembering Hedley* Coral Bell, Meredith Thatcher, 2008-08-01 Remembering Hedley

commemorates the life of Hedley Bull 1932-85 a pivotal figure in the fields of international relations and strategic studies Its publication coincides with the official opening on 6 August 2008 of the Hedley Bull Centre at The Australian National University in Canberra **The Anarchical Society at 40** Hidemi Suganami, Madeline Carr, Adam Richard Copeland

Humphreys, 2017 First published in 1977 Hedley Bull's *The Anarchical Society* is one of the classic texts in International Relations This volume revisits Bull's work providing new readings of the text developing new criticisms and exploring its relevance to a wide range of contemporary issues in world politics The Anarchical Society in a Globalized World R.

Little, J. Williams, 2006-05-02 Following Bull's structure it considers key concepts major institutions and alternative approaches to order and reasserts the enduring insight of Bull's work whilst responding to major developments in the theory and practice in international relations *International Society and the Development of International Relations Theory* B. A.

Roberson, 2002-04-30 A critical appreciation of the development of the international society idea and its influence on and relation to the development of the international relations theory A critical look is taken at the intellectual development of key members of the English School The concept of the School itself and the place of the School's theory in contemporary international relations approaches are examined *International Order in a Globalizing World* Yannis A.

Stivachtis, 2016-04-22 There is a growing recognition that globalization is leading to fundamental changes in world order creating new imperatives and requiring new ways of understanding the international system Two of the most important

actors in the contemporary international system are the United States and Europe and their relationship is fundamental in shaping international order International order shapes and is also being shaped by the forces of globalization whether cultural political or economic This volume examines issues that transcend national and cultural boundaries discussing international order from the perspective of the English School of International Relations It covers areas such as great powers foreign policy relations among great powers sovereignty democracy and legitimacy international terrorism and intelligence and institutions and international organizations Ultimately it analyzes what is to be done to assure a stable international order The volume is relevant to security studies foreign policy transatlantic relations and international organizations as well as international relations theory

Power Transition in the Anarchical Society Tonny Brems Knudsen, Cornelia Navari, 2022-07-09 This book examines the ongoing power transition and its ramifications for world order from an international society perspective In that perspective the outcome of big changes in the distribution of power is a matter of socialization rather than structural determination or the resilience of the so called Liberal world order Consequently the key question of this book is how the ongoing power transition affects and is affected by the social institutions of world order including sovereignty the balance of power international law diplomacy trade humanitarian intervention national self determination and environmental stewardship The guiding theoretical assumption of the book is that power transition stimulates fundamental institutional change rather than major conflict or a breakdown of international order while international organizations are key arenas for the realization and negotiation of such changes not the victims of hegemonic retreat The argument is pursued in sections on rising and declining powers Anglo America Russia China and the EU among others consequences for the fundamental social institutions and changes in international organizations globally and regionally In combination the chapters reveal the contours of the coming world order

Culture and Order in World Politics Andrew Phillips, Christian Reus-Smit, 2020-01-09 Provides a new framework for reconceptualizing the historical and contemporary relationship between cultural diversity political authority and international order

The Concertation Impulse in World Politics Andrew F. Cooper, 2023-11-30 This book unravels the centrality of contestation over international institutions under the shadow of crisis Breaking with the widely accepted image in the mainstream US centric literature of an advance of global governance supported by pillars of institutionalized formality Andrew Cooper points to the retention of a habitual impulse towards concertation related to informal institutionalism Rather than endorsing the view that world politics is moving inexorably towards a multilateral rules based order he places the onus on the resilience of a hierarchical self selected concert model that combines a stigmatized legacy with the ability to reproduce in an array of associational formats Relying for conceptual guidance on the recovery of a valuable component in the intellectual contribution of Hedley Bull a compelling case is made that concertation represents a fundamental institution as a peer competitor to multilateralism In effect the debate over institutional design is recast away from an emphasis on utilitarian

maximization towards a wider set of cardinal and highly contested questions the nature of rules at the global level the salience of institutional clubs and the meaning and impact of in equality and cooperation coordination among states across the incumbent West non incumbent Global South divide

The Struggle for Order Evelyn Goh,2013-08-15 How has world order changed since the Cold War ended Do we live in an age of American empire or is global power shifting to the East with the rise of China Arguing that existing ideas about balance of power and power transition are inadequate this book gives an innovative reinterpretation of the changing nature of U S power focused on the order transition in East Asia Hegemonic power is based on both coercion and consent and hegemony is crucially underpinned by shared norms and values Thus hegemons must constantly legitimize their unequal power to other states In periods of strategic change the most important political dynamics centre on this bargaining process conceived here as the negotiation of a social compact This book studies the re negotiation of this consensual compact between the U S China and other states in post Cold War East Asia It analyses institutional bargains to constrain and justify power attempts to re define the relationship between a regional community and the global economic order the evolution of great power authority in regional conflict management and the salience of competing justice claims in memory disputes It finds that U S hegemony has been established in East Asia after the Cold War mainly because of the complicity of key regional states But the new social compact also makes room for rising powers and satisfies smaller states insecurities The book controversially proposes that the East Asian order is multi tiered and hierarchical led by the U S but incorporating China Japan and other states in the layers below it

Institutional Change and the International Criminal Court Cenap Çakmak,2021-09-12 This book explores the dynamics and trajectories of change in international politics through an English School analysis of primary institutions including international law sovereignty and diplomacy with particular reference to the creation of the International Criminal Court ICC The study argues that it serves as an important indicator and model for redefining international politics particularly through its impact upon three major institutions as prescribed by the English School international law sovereignty and diplomacy The author explores three major areas the ICC s contribution to the

consolidation of the individual as a subject of the international law the significance of the Court and its jurisdiction in terms of the state sovereignty and the strong and determinative role of non state actors active on global level during the diplomatic process upheld for the making of the norms and rules during the creation of the ICC These three fields of change point out to the redefinition and reconstruction of international politics heralding a solidarist vision of international society The book will be of particular interest to researchers in the field of the IR as well as graduate students interested in IR theory international law and international organizations

Rebooting Global International Society Trine Flockhart, Zachary Paikin, 2023-01-01 This book asks if it is time to reboot the fundamental institutions of global international society The volume revisits Hedley Bull s seminal contribution *The Anarchical Society* by exploring the interconnected nature of change contestation and resilience for maintaining order in today s uncertain and complex environment The volume adds to Bull s theorizing by recognizing that order demands change that contestation should be welcomed and that resilience is anchored in local and agent led forms of ordering The contributors to Part One of the book focus on theoretical and conceptual issues related to order in the global international society whilst the contributors to Part Two of the book focus on the primary institutions as listed by Hedley Bull with the addition of a chapter on the market adding a distinctive commentary on new and important dynamics of change contestation and resilience of the existing institutions

Drones and Global Order Paul Lushenko, Srinjoy Bose, William Maley, 2021-12-28 This book explores the implications of drone warfare for the legitimacy of global order The literature on drone warfare has evolved from studying the proliferation of drones to measuring their effectiveness to exploring their legal moral and ethical impacts These three waves of scholarship do not however address the implications of drone warfare for global order This book fills the gap by contributing to a fourth wave of literature concerned with the trade offs imposed by drone warfare for global order The book draws on the English School of International Relations Theory which is premised on the existence of a society of states bounded by common norms values and institutions to argue that drone warfare imposes contradictions on the structural and normative pillars of global order These consist of the structure of international society and diffusion of military capabilities as well as the sovereign equality of states and laws of armed conflict The book presents a typology of contradictions imposed by drone warfare within and across these axes that threaten the legitimacy of global order This framework also suggests a confounding consequence of drone warfare that scholars have not hitherto explored rigorously drone warfare can sometimes strengthen global order The volume concludes by proposing a research agenda to reconcile the complex and often counter intuitive impacts of drone warfare for global order This book will be of considerable interest to students of security studies global governance and International Relations

States and the Masters of Capital Quentin Bruneau, 2022-12-13 Winner 2025 Francesco Guicciardini Prize for Best Book in Historical International Relations Historical International Relations section International Studies Association Today states ability to borrow private capital

depends on stringent evaluations of their creditworthiness. While many presume that this has long been the case, Quentin Bruneau argues that it is a surprisingly recent phenomenon, the outcome of a pivotal shift in the social composition of financial markets. Investigating the financiers involved in lending capital to sovereigns over the past two centuries, Bruneau identifies profound changes in their identities, goals, and forms of knowledge. He shows how an old world made up of merchant banking families pursuing both profit and status gradually gave way to a new one dominated by large companies such as joint stock banks and credit rating agencies exclusively pursuing profit. Lacking the web of personal ties to sovereigns across the world that their established rivals possessed, these financial institutions began relying on a different form of knowledge created to describe and compare states through quantifiable data statistics. Over the course of this epochal shift, which only came to an end a few decades ago, financial markets thus reconceptualized states. Instead of a set of individuals to be known in person, they became numbers on a page. Raising new questions about the history of sovereign lending, this book illuminates the nature of the relationship between states and financial markets today and suggests that it may be on the cusp of another major transformation.
