Architecture and Social Reform in

Late-Victorian London Deborah E. B. Weiner, 1994 Amidst the sea of squalid brick tenements and working class two up two down houses of late nineteenth century London new building types arose large in scale and bold in their message the triple storied Queen Anne board schools the mock Elizabethan settlement houses an Arts and Crafts free public art gallery replete with mystic symbolism and as first conceived a neo Byzantine pleasure palace for the working classes

Sir James Pennethorne and the Making of Victorian London Geoffrey Tyack, 1992-12-10 For a period of thirty years in the mid

nineteenth century James Pennethorne was more intimately involved with the planning and building of London than any other major architect A pupil of John Nash he took over his teacher's practice and became government architect for the first half of Victoria's reign He was responsible for the planning of new streets the laying out of parks and the design of important public buildings such as the Public Record Office the west wing of Somerset House and the Duchy of Cornwall office It is therefore almost impossible for Londoners to avoid coming into contact with some aspect of his work This study throws fresh light on some of the main architectural issues and controversies of the time Even more important it contributes to an understanding of the complicated relationship between government and architects and of the forces which created the London of the nineteenth century and of today The book therefore makes a contribution to the history of urban planning and to urban and architectural history in general in addition to offering an important new assessment of Pennethorne himself

London Paul Knox, 2024-04-23 A lively new history of London told through twenty five buildings from iconic Georgian townhouses to the Shard A walk along any London street takes you past a wealth of seemingly ordinary buildings an Edwardian church modernist postwar council housing stuccoed Italianate terraces a Bauhaus inspired library But these buildings are not just functional They are evidence of London's rich and diverse history and have shaped people's experiences identities and relationships In this engaging study Paul L Knox traces the history of London from the Georgian era to the present day through twenty five surviving buildings Knox explores where people lived and worked from grand Regency squares to Victorian workshops and highlights the impact of migration gentrification and inequality We see famous buildings like Harrods and Abbey Road Studios and everyday places like Rochelle Street School and Thamesmead Each historical period has introduced new buildings and old ones have been repurposed As Knox shows it is the living history of these buildings that makes up the vibrant but exceptionally unequal city of today

The Battle of the Styles Bernard Porter, 2011-03-17 The present day Foreign Office in Whitehall is an imposing building whose genesis is bizarre In 1857 a competition was held to pick an architect which provoked a huge row between the rival Classical and Gothic schools which a Goth George Gilbert Scott won but was then forced to re-design in Classical The circumstances surrounding this fiasco furnish the starting point for this book which then goes on to analyse the debate that preceded this decision for the light it sheds on the complex nature of British culture and society then Among issues raised were contemporary and conflicting understandings of Britain's or England's national and imperial identities of religion and morality of history modernity and progress and of class and gender The debate offers an unusual insight into the relationship between all these matters and high culture generally This account of it should be of great value to cultural and social historians as well as to any architectural historians interested in the broader historical context surrounding this and other great monuments of the time
