Reeve, 2015-03-15 This concise anthology of primary sources designed for use in an ancient philosophy survey ranges from the Presocratics to Plato Aristotle the Hellenistic philosophers and the Neoplatonists The Second Edition features an amplified selection of Presocratic fragments in newly revised translations by Richard D McKirahan Also included is an expansion of the Hellenistic unit featuring new selections from Lucretius and Sextus Empiricus as well as a new translation by Peter J Anderson of most of Seneca's De Providentia The selections from Plotinus have also been expanded      **What If the American Political System Were Different?** Herbert M. Levine, 2015-02-24 First Published in 2015 This unique book is an ideal supplement for an introductory American politics course Each chapter consider a basic aspect of the American political system or historical tradition and speculates as to the consequences were that aspect fundamentally different Engagingly written by political scientists historians and a legal solicitor the book is non ideological throughout and invites reflection and discussion Each chapter will encourage readers to think critically about the American political system elate the relationships between different political structures and policy outcomes and in general consider American politics in an exciting new way      **Transatlantic Regulation** Susanne Lütz, 2016-03-16 The European and American economies are closely interlinked as mutually important investment and trading partners The growing intensity of economic interdependence has spurred the transatlantic coordination of rules and standards that can lead to the formation of non tariff barriers to transatlantic commerce But despite impressive government to government efforts to eliminate market barriers the E U and the U S have frequently clashed over each other's regulatory policies The aim of this book is to explore the domestic sources of cooperation or conflict in transatlantic regulation The book analyses the role of domestic factors through three theoretical lenses that are well established in the study of multilevel systems the principal agent approach the two level game metaphor and through a wider concept of institutionalism which emphasises the links between societal interests and regulatory ideas with institutional frameworks The book states that domestic factors embody more obstacles than opportunities for horizontal coordination It is argued that transatlantic relations will likely undergo a double movement of being simultaneously shifted upwards to become part of the global governance architecture and downwards towards broader involvement of legislators in regulatory matters Hence transatlantic regulation might in the near future be shaped more by political leaders rent seeking interest groups and legislators than by networks of technocrats This book was published as a special issue of the Review of International Political Economy      **Introduction to International Relations** Robert H. Jackson, Georg Sørensen, 2007 This edition provides a systematic introduction to the principle theories in international relations It focuses on the main theoretical traditions realism liberalism international
