The Architecture Of Deconstruction Derridas Haunt:

The Architecture of Deconstruction Mark Wigley, 1993 By locating the architecture already hidden within deconstructive discourse Wigley opens up more radical possibilities for both architecture and deconstruction *On Deconstruction* Jonathan Culler, 2014-10-01 With an emphasis on readers and reading Jonathan Culler considered deconstruction in terms of the questions raised by psychoanalytic feminist and reader response criticism *On Deconstruction* is both an authoritative synthesis of Derrida's thought and an analysis of the often problematic relation between his philosophical writings and the work of literary critics Culler's book is an indispensable guide for anyone interested in understanding modern critical thought This edition marks the twenty fifth anniversary of the first publication of this landmark work and includes a new preface by the author that surveys deconstruction's history since the 1980s and assesses its place within cultural theory today

Architecture's Historical Turn Jorge Otero-Pailos, 2013-11-30 *Architecture's Historical Turn* traces the hidden history of architectural phenomenology a movement that reflected a key turning point in the early phases of postmodernism and a legitimating source for those architects who first dared to confront history as an intellectual problem and not merely as a stylistic question Jorge Otero Pailos shows how architectural phenomenology radically transformed how architects engaged theorized and produced history In the first critical intellectual account of the movement Otero Pailos discusses the contributions of leading members including Jean Labatut Charles Moore Christian Norberg Schulz and Kenneth Frampton For architects maturing after World War II Otero Pailos contends architectural history was a problem rather than a given Paradoxically their awareness of modernism's historicity led some of them to search for an ahistorical experiential constant that might underpin all architectural expression

They drew from phenomenology exploring the work of Bachelard Merleau Ponty Heidegger and Ricoeur which they translated for architectural audiences Initially the concept that experience could be a timeless architectural language provided a unifying intellectual basis for the stylistic pluralism that characterized postmodernism It helped give theory especially the theory of architectural history a new importance over practice However as Otero Pailos makes clear architectural phenomenologists could not accept the idea of theory as an end in itself In the mid 1980s they were caught in the contradictory and untenable position of having to formulate their own demotion of theory Otero Pailos reveals how ultimately the rise of architectural phenomenology played a crucial double role in the rise of postmodernism creating the antimodern specter of a historical consciousness and offering the modern notion of essential experience as the means to defeat it

This Thing Called Theory Teresa Stoppani, Giorgio Ponzio, George Themistokleous, 2016-11-10 In the age of post digital architecture and digital materiality *This Thing Called Theory* explores current practices of architectural theory their critical and productive role The book is organized in sections which explore theory as an open issue in architecture as it relates to and borrows from other disciplines thus opening up architecture itself and showing how architecture is inextricably connected to other social and theoretical practices The sections move gradually from the specifics of architectural thought its history theory and criticism and their ongoing relation with philosophy to the critical positions formulated through architecture's specific forms of expression and onto more recent forms of architecture's engagement and self definition The book's thematic sessions are concluded by and interspersed with a series of shorter critical position texts which together propose a new vision of the contemporary role of theory in architecture What emerges overall is a critical and productive role for theory in architecture today theory as a proposition theory as task and as a risk of architecture

A Reflexive Reading of Urban Space Mona A. Abdelwahab, 2018-02-13 Providing a critique of the concepts

attached to the representation of urban space this ground breaking book formulates a new theory of space which understands the dynamic interrelations between physical and social spaces while tracing the wider urban context It offers a new tool to approach the reading of these interrelations through reflexive reading strategies that identify singular reading fragments of the different spaces through multiple reader time space relations The strategies proposed in the volume seek to develop an integrative reading of urban space through recognition of the singular influenced by discourse institution etc and temporal influenced by reading perspective in space and time thereby providing a relational perspective that goes beyond the paradox of place in between social and physical space identifying each in terms of relationships oscillating between the conceptual the physical and social content and the context In conclusion the book suggests that space place can be read through sequential fragments of people place context mind and author reader Operating at different scales between conceptual space and reality the sequential reading helps the recognition of multiplicity and the dynamics of place as a transformational process without hierarchy or classification

consciousness The architect as philosophers liked to think of him was obligated by the design and construction process to mediate between the abstract and the actual In *On the Ruins of Babel* Daniel Purdy traces this notion back to its wellspring He surveys the volatile state of architectural theory in the Enlightenment brought on by the newly emerged scientific critiques of Renaissance cosmology then shows how German writers redeployed Renaissance terminology so that harmony unity synthesis foundation and orderliness became states of consciousness rather than terms used to describe the built world Purdy's distinctly new interpretation of German theory reveals how metaphors constitute interior life as an architectural space to be designed constructed renovated or demolished He elucidates the close affinity between Hegel's Romantic aesthetic of space and Daniel Libeskind's deconstruction of monumental architecture in Berlin's Jewish Museum Through a careful reading of Walter Benjamin's writing on architecture as myth Purdy details how classical architecture shaped Benjamin's modernist interpretations of urban life particularly his elaboration on Freud's archaeology of the unconscious Benjamin's essays on dreams and architecture turn the individualist sensibility of the Enlightenment into a collective and mythic identification between humans and buildings

Architectural Principles in the Age of Cybernetics Christopher Hight, 2007-12-12 A theoretical history of anthropomorphism and proportion in modern architecture this volume brings into focus the discourse around proportion with current problems of post humanism in architecture alongside the new possibilities made available through digital technologies The book examines how the body and its ordering has served as a central site of architectural discourse in recent decades especially in attempts to reformulate architecture's relationship to humanism modernism and technology Challenging some concepts and categories of architectural history and situates current debates within a broader cultural and technological context Hight makes complex ideas easily accessible Extensively illustrated and written without academic jargon for an informed but non specialized architectural audience this book elucidates the often obscure debates of avant garde architectural discourse and design while demonstrating how these debates have affected everyday places and concepts of architecture As a result it will appeal to professional architects academics and students combining as it does an insightful introduction to the fundamental issues of architectural history and theory over the past fifty years with entirely new formulations of what that history is and means
