Division of

Vocational and Technical Education, Walter J. Brooking, 1970      *Selected List of American Agricultural Books in Print and Current Agricultural Periodicals*, 1960      **The Art of Real Estate** Debbi DiMaggio, Adam Betta, 2015-04-21 Debbi DiMaggio's newest book is the first in The Art of Real Estate series an upcoming sequence of convenient and practical guides to specific real estate markets across the United States In this East Bay edition interested local buyers and sellers find area specific advice on navigating local market trends choosing the ideal real estate agent successfully marketing a home for sale and managing financial concerns among many other topics The book also contains a myth busting chapter that addresses common industry misconceptions from a real estate agent's insider point of view and copies of essential real estate documents and forms This extremely localized guide focusing on Debbi's major real estate markets in Piedmont Oakland Berkeley and Montclair is a must have for any savvy buyer or seller looking to do business in the area      *Private Landscapes* Pamela Burton, Marie Botnick, 2002 When we think of the gardens of Southern California we tend to think of the enormous semiarid landscapes of the Huntington and Rancho Los Alamitos often built on the sprawling grounds of former ranches But there is another garden tradition in Southern California the modest rectangular suburban plots designed by the most famous architects of mid century modernism Richard Neutra Rudolph Schindler Gregory Ain Raphael Soriano Harwell Hamilton Harris A Quincy Jones and John Lautner These architects saw the garden as an outdoor extension of the space of the houses they designed rather than a neo Spanish fantasy to be added later by a landscapist Their modern gardens made use of low maintenance drought resistant plants and made room for informal outdoor living by children and adults with an emphasis on recreation and exercise The first book of its kind Private Landscapes profiles twenty significant gardens and their accompanying houses by these celebrated architects Using contemporary photographs by Julius Shulman and newly commissioned color images along with plans and plant lists Private Landscapes provides a never before seen look at these gardens As beautiful and practical now as they were 50 years ago these designs continue to provide inspiration for gardeners and designers everywhere      **Landscape Design in Color** Mira Engler, 2022-12-27 Architects landscape architects and urban designers experiment with color and lighting effects in their daily professional practice Over the past decade there has been a reinvigorated discussion on color within architectural and cultural studies Yet scholarly enquiry within landscape architecture has been minimal despite its important role in landscape design This book posits that though color and lighting effects appear natural fleeting and difficult to comprehend the sensory palette of built landscapes and gardens has been carefully constructed to shape our experience and evoke meaning and place character Landscape Design in Color History Theory and Practice 1750 to Today is an inquiry into the themes theories and debates on color and its impact on practice in Western landscape architecture over the past three centuries Divided into three key periods each chapter in the book looks at the use of color in the written and built work of key prominent designers The book investigates thematic juxtapositions such as natural and artificial color and line design and draftsmanship sensation and concept imitation and translation

deception and display and decoration and structure and how these have appeared faded disappeared and reappeared throughout the ages Richly designed and illustrated in full color throughout including color palettes this book is a must have resource for students scholars and design professionals in landscape architecture and its allied disciplines *The Modern Garden* Pierluigi Serraino,2024-10-01 Visionary landscape architecture and garden design at mid century in North America is captured by the greats of the era including Julius Shulman and Ezra Stoller in many previously unpublished photographs The treasures of mid century American architecture have long been celebrated Less appreciated has been the landscape design that provides the framing for these masterworks But more than frame landscape architecture is an art worthy of the spotlight particularly at mid century when the notion that gardens are outdoor spaces for people to live in was championed and brought to the fore now gardens and landscapes are not just external attributes to the house but a continuation of it and its living spaces in a relationship of symbiosis with its pools and terraces its winding lawns and its partly enclosed room like spaces flanked by brick or stone or plantings in a range of colors and forms Approximately seventy five mostly residential projects are thoroughly documented and recounted Landscape architects whose work is featured include Thomas Church Lawrence Halprin and Garrett Eckbo among others Highlights include the dramatic surrounds of Richard Neutra s Perkins House in its Pasadena hillside setting and Frank Lloyd Wright s Marin County Civic Center where environment and building comeing in an extraordinary modernist vision of the future made real This book is both a wishful gesture toward a realignment of building with nature and a must have for anyone with a visceral appreciation for a designed environment understood as an integrated whole Ultimately the book underlines the fundamental importance of gardens and landscape design intended in the widest possible sense for the quality of living of all individuals Art Books, 1950-1979 R.R. Bowker Company,1979

**The Art of Hummingbird Gardening** Mathew Tekulsky,2015-04-07 This book is devoted solely to hummingbird gardening and is a practical guide to cultivating flowers and other plants that will attract the hummingbirds of North America to your home and garden You will be able to grow flowers in profusion and provide nectar for these smallest of birds which hover on fast beating wings while they drink from flowers including pink Chinese lantern bladderpod woolly blue curls scarlet sage penstemon columbine long strips of fuschia and many others The Hummingbird Garden is packed with pertinent information from a description of what hummingbird gardening is all about to how hummingbirds can be conserved and protected Tekulsky explains the extraordinary way hummingbirds live and behave the regions they inhabit throughout the year and their migrating habits He discusses how to start your own garden by recommending what to plant and then outlines what interesting events will take place in it The valuable appendixes give complete information on hummingbird and plant varieties bird and conservation organizations and mail order sources as well as an extensive bibliography Beautiful color photos throughout show many different types of hummingbirds enjoying their wonderfully active lives in gardens created expressly for them Library List National Agricultural Library (U.S.),1958 Karl Langer ,2021-12-30 Despite a

European training and an early career working with Peter Behrens a migration from Vienna to the Australian state of Queensland positioned the architect Karl Langer 1903 1969 at the very edge of both European and Australian modernism Confronted by tropical heat and glare the economics of affordable housing fiercely proud and regional architectural practices and a suspicion of the foreign Langer moulded the European language of international modernism to the unique climatic and social conditions of tropical Australia This book will tell Langer s story through a series of edited essays focused on key themes and projects Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet overlooked modernist architects it is both an examination of an architect s work and international legacy and also a case study in the trans global dissemination of design ideas Studying the architect s built and proposed work both regional and metropolitan the scale and reach of Langer s practice will be considered for the first time showing how given his continued influence on the contemporary culture of tropical design Langer has been unjustly ignored by the historiography of both Australian and Modernist architecture to date      **Settings and Stray Paths** Marc Treib,2018-10-24 These collected works represent twenty five years of study of the designed landscape which the author here takes to include gardens cemeteries plazas and other shared spaces Asking essential questions about the nature of order and its perception this book includes in its impressive scope analyses of both historic and modern works with a geographical distribution that extends across Europe Asia and North America With unique depth in many areas of study Treib brings his expertise to bear on a range of inter related and mutually influential issues within the subject taking in an assessment of the lives and contributions of a number of leading figures in the field the contents of a landscape and the meanings ascribed to it and a theoretical formulation of the ideas from which or by which landscape architecture is produced      The Modern Garden Jane Brown,2000-10 The Modern Garden is the first fully illustrated overview of the great gardens of the twentieth century It examines hundreds of gardens created throughout the century and around the world from the works of Geoffrey Jellicoe to Roberto Burle Marx Russell Page to Dan Kiley BOOKJACKET
