and performance measurement Author Anthony Trotta demonstrates the ways in which technology creates new problems for contemporary government including a discussion of virtual currency and its possible issues that must be addressed by the public sector The discussion avoids highly technical language and confusing industry jargon focusing instead on explaining important concepts in an accessible fashion applicable to a broad spectrum of readers Technology and American Democracy is required reading for students enrolled in courses on politics public administration and public policy **Bulletin of the Atomic Scientists** ,1986-01 *The Fate of Labour Socialism* James Naylor,2016-05-12 Almost a century before the New Democratic Party rode the first orange wave their predecessors imagined a movement that could rally Canadians against economic insecurity win access to necessary services such as health care and confront the threat of war The party they built during the Great Depression the Co operative Commonwealth Federation CCF permanently transformed the country s politics Past histories have described the CCF as social democrats guided by middle class intellectuals a party which shied away from labour radicalism and communist agitation James Naylor s assiduous research tells a very different story a CCF created by working class activists steeped in Marxist ideology who sought to create a movement that would be both loyal to its socialist principles and appealing to the wider electorate The Fate of Labour Socialism is a fundamental reexamination of the CCF and Canadian working class politics in the 1930s one that will help historians better understand Canada s political intellectual and labour history Intellectual and Manual Labour Alfred Sohn-Rethel,2020-11-23 Alfred Sohn Rethel s Intellectual and Manual Labour is one of the major texts of post war Marxist theory A tremendous influence on the major writers of the Frankfurt School with ongoing relevance to current debates about value abstraction and domination Sohn Rethel s ideas are here presented at their fullest scope and with their greatest theoretical clarity Out of print for many years this new Historical Materialism edition contains a new introduction by Chris O Kane an afterword by Chris Arthur and a compilation of the responses to Intellectual and Manual Labour published in the Italian journal Lotta Continua including a substantial article by Antonio Negri **Worldviews, Ethics and Organizational Life** Michel Dion,2021-11-24 This book provides an innovative way to revisit the depth and scope of our moral post moral worldviews while undertaking an ontic reflection about organizational life The ontic dimension of life refers to existing entities lived experiences It has nothing to do with psychological and relational processes The ontic level of analysis mirrors a philosophical outlook on organizational life Unlike moral worldviews post moral worldviews oppose the existence of Truth itself Post moral worldviews rather imply that dialogical relationships allow people to express their own truth claims and welcome others truth claims The purpose of this book is to explain the philosophical implications of moral and post moral worldviews and the way to move from a moral to a post moral worldview Moreover this book explores the possibility to transcend the moral post moral dualism through moral deliberation processes and a reinterpretation of the Presence of the Infinite in all dimensions of human life This book could eventually help to better grasp the basic philosophical challenges behind ethical reflection about organizational issues

Expertise Mirko Farina, Andrea Lavazza, Duncan Pritchard, 2024 This is a collective study of philosophical questions to do with experts and expertise such as What is an expert Who decides who the experts are Should we always defer to experts How should expertise inform public policy What happens when the experts disagree Must experts be unbiased Does it matter what the source of the expertise is

Little America Erik Paul, 2006-09-20 Australia is one of the US's most staunch supporters Australia has sent troops to Iraq and is an ally in the war on terror Australian domestic policy also follows the US economic model as state industries and services have been privatised Erik Paul dissects the relationship between Australia and the US He explores how Australia has become a key player in maintaining American dominance in South East Asia and looks critically at the contrast between the Australian wealth and the comparative poverty of surrounding nations Examining the influence of neoconservative imperialism on Australia's economic and military strategies he draws some startling conclusions about future Australian relationships in East Asia in particular its relationship with China

How Outer Space Made America Daniel Sage, 2016-04-29 In this innovative book Daniel Sage analyses how and why American space exploration reproduced and transformed American cultural and political imaginations by appealing to and to an extent organizing the transcendence of spatial and temporal frontiers In so doing he traces the development of a seductive and powerful yet complex and unstable American geographical imagination the transcendental state Historical and indeed contemporary space exploration is despite some recent notable exceptions worthy of more attention across the social sciences and humanities While largely engaging with the historical development of space exploration it shows how contemporary cultural and social and indeed geographical research themes including national identity critical geopolitics gender technocracy trauma and memory can be informed by the study of space exploration

Everyday Life in the Modern World Henri Lefebvre, 2023-09-28 Philosopher sociologist and urban theorist Henri Lefebvre 1901 1991 was one of the great social theorists of the twentieth century and pioneered the theorization of everyday life and space In this fascinating book which became a manifesto for urban activism upon its first publication in the 1960s Lefebvre poses a major question what gives a society undergoing constant change the illusion of stability For Lefebvre the answer is that our everyday lives are the product of decisions from which we are alienated resulting in what he memorably describes as terror enforced passivity Modern capitalism produces and controls the space around us the buildings we work in the roads we drive on and even the parks surrounding us are artificial and controlled isolating the individual in a life of repetition Lefebvre rejects such a world of control and monotony urging instead a spontaneous utopian creativity in which human beings can engage in meaningful work and leisure Profound and prophetic for its insights into the impact of capitalism and urbanization Everyday Life in the Modern World remains a classic work by a towering thinker and essential reading today This Routledge Classics edition includes a new Foreword by Claire Revol and Rob Shields
