Technological Change In China:

Technological Change in China Richard Conroy, 1992 **Technological Progress and the Transformation of China's Economic Development Mode** Wen Xiao, 2020-10-01 This book explores how technological progress accelerates the transformation of economic development by adopting a fundamental logical approach to technological progress intensive inputs and promotion of productive efficiency to transformation of economic development It investigates the internal mechanisms and the choice of corresponding modes that initiate technological progress to accelerate the transformation of economic development at three basic research levels micro enterprise level mid industry level and macro economy level Based on the above research the book summarizes four dimensions facilitating the transformation agricultural intensification new industrialization modernization of the service industry and the advanced manufacturing industry and linkage of the modern service industry This book is especially valuable in its hierarchical categorization covering theoretical empirical industrial and strategic exploration On one hand it analyzes the mechanisms and approaches influencing the transformation of economic development driven by technological progress from both theoretical and empirical perspectives On the other hand based on the introduction of advanced international experiences it probes into the guarantee basis for the strategic implementation and the corresponding mode choices of the transformations Furthermore it offers specific policy proposals from both the macro level of how technological progress promotes the transformation of economic development and the micro level covering the agricultural industrial and service industries The Endogenous Energy-Saving Technological Change in China's Industrial Sector Xubo He, 2022-11-29 As improving energy efficiency and increasing energy R it established a mathematical model for the endogenous energy saving technological advancement of the industrial sector based on heterogeneous R it estimated the energy saving technological progress rate of 37 Chinese industrial sub sectors from 1980 to 2010 fourth it has empirically examined the relationship between the heterogeneous R D investment in China s industrial sector and its energy saving technological advancement rate *Rural-Urban Migration and Agro-Technological Change in Post-Reform China* Lena Kaufmann, 2025-10-01 How do rural Chinese households deal with the conflicting pressures of migrating into cities to work as well as staying at home to preserve their fields This is particularly challenging for rice farmers because paddy fields have to be cultivated continuously to retain their soil quality and value Drawing on ethnographic fieldwork and written sources *Rural Urban Migration and Agro Technological Change in Post Reform China* describes farming households strategic solutions to this predicament It shows how in light of rural urban migration and agro technological change they manage to sustain both migration and farming It innovatively conceives rural households as part of a larger farming community of practice that spans both staying and migrating household members and their material world Focusing on one exemplary resource paddy fields it argues that socio technical resources are key factors in understanding migration flows and migrant home relations Overall this book provides rare insights into the rural side of migration and

farmers knowledge and agency *Technology, Politics, And Society In China* Rudi Volti, 2019-07-11 This study is the first to summarize the major technological policies implemented in China since 1949 and to place them in their social and historical context Dr Volti looks at technological change in China as part of a broader process of economic political cultural and organizational change focusing primarily on four key areas agriculture energy ground transportation and medicine and public health He emphasizes how technological change has been shaped by political and ideological structures notes how China's unique cultural heritage has affected adoption of technologies developed outside China and assesses China's success in developing technologies appropriate to its specific needs as an economically and politically developing nation He draws on interviews with technicians engaged in the transfer of technology to China as well as extensive primary source materials

Technological Development in China, India and Japan Erik Baark, Andrew Jamison, 1986-06-18 China's National Governance from the Perspective of Technological Innovation and System Management Zhicheng Tang, 2021-09-01

Technology and Industrial Transformation of China Yanqing Jiang, Jiwei Gu, 2022-10-30 This book explores how China's industrial transformation and development depend on technology and innovation and how considerations about issues associated with technology and innovation may affect China's development strategies Market oriented reforms initiated four decades ago have constantly fueled a high speed of development in China The country's industrial structure has experienced rapid evolution In the meantime especially in the general context of globalization the country has also opened to foreign trade and foreign direct investment transforming itself from a virtually completely closed economy into a major trading nation and the largest developing country destination for foreign direct investment in the world Technology is thought to be one of the key driving forces that shape the transformation of the Chinese economy Owing to different speeds of innovation and technology diffusion uneven development is one major issue in the process of China's industrial transformation under new trends of globalization Substantial disparities across different Chinese regions e.g. the gaps in regional industrial development and those in incomes and living standards have been one prominent feature of China and are needless to say closely related to different speeds of innovation and technology diffusion The relationship between technology diffusion innovation and industrial development is an important yet complicated issue that deserves careful study Considerations related to technology and innovation play a crucial role in leading and shaping China's development strategies and routes Sustainable development of China creates strong pressures for continuous transforming upgrading and restructuring of the Chinese economy and in all of these processes innovation and technology diffusion play a fundamental role The book presents to the interested reader facts thoughts models empirical results and discussions that shed light on those issues Economic development, social consequences, and technological innovation under climate change covid-19 pandemic conditions Cem Işık, Asif Razzaq, Vishal Dagar, 2023-02-10 Technological Development, Society And State: Western And Chinese Civilizations In Comparison - Proceedings Of The Joint Conference Welf Heinrich Schnell, Wolfgang

Radtko, Hans Poser, W König, 1991-10-16 This is a collection of essays focused on problems concerning the philosophy of technology the concept of nature the relationships between policy and economic development on the one hand and technological development on the other hand with respect to philosophical principles historical and cultural background both in Western and Chinese Civilization China's Four Modernizations Richard Baum, 2019-03-13 With the death of Mao Tse tung and the subsequent purge of the Gang of Four China's new pragmatic leaders have embarked on a crash program of national development known as the Four Modernizations This program is geared to the primary objective of turning China into a major world economic and military power by the year 2000 In this book the outgrowth of a major international conference on China's post Maoist development ten distinguished analysts examine one of the core issues in China's current modernization drive the acquisition and use of modern industrial science and technology The authors address the politics of China's technological modernization the institutional structure of technological research the purchase of foreign technology constraints on technological absorption the growth potential of China's critical energy sector and the modernization of China's military establishment Supplemented with brief commentaries by leading academic government and private sector contributors their chapters provide an in depth look at the process problems and prospects of China's widely heralded technological revolution **The Cultural Revolution in China** James C.F. Wang, 2018-09-18 The Cultural Revolution in China generated a cascade of commentaries and interpretations on the development and meaning of the upheaval Many students and researchers have found it difficult to locate and identify literature on the period This bibliography first published in 1976 corrects this situation It lists all books monographs and journal articles in English on the Cultural Revolution each annotated to show its relevance a vital reference source **The Technological Transformation of China** T. David McDonald, 1990 A description of the steps China is taking to improve the lives of its populace and bring its society into the modern world of the late 20th century Addresses the monumental tasks China faces in improving areas such as defense industry agriculture and science and technology S T Also covers what the U S response to these massive changes should be Covers the Chinese commitment the challenges of the S T revolution applications to the Chinese economy societal consequences the acquisition process commercial investment and U S gov t policy *China's Quest for Foreign Technology* William C. Hannas, Didi Kirsten Tatlow, 2020-09-22 This book analyzes China's foreign technology acquisition activity and how this has helped its rapid rise to superpower status Since 1949 China has operated a vast and unique system of foreign technology spotting and transfer aimed at accelerating civilian and military development reducing the cost of basic research and shoring up its power domestically and abroad without running the political risks borne by liberal societies as a basis for their creative developments While discounted in some circles as derivative and consigned to perpetual catch up mode China's hybrid system of legal illegal and extralegal import of foreign technology combined with its indigenous efforts is the authors believe enormously effective and must be taken seriously Accordingly in this volume 17 international specialists combine

their scholarship to portray the system's structure and functioning in heretofore unseen detail using primary Chinese sources to demonstrate the perniciousness of the problem in a manner not likely to be controverted. The book concludes with a series of recommendations culled from the authors' interactions with experts worldwide. This book will be of much interest to students of Chinese politics, US foreign policy, intelligence studies, science and technology studies, and International Relations in general. *China's High Technology Development, April 21 and 22, 2005, 109-1 Hearing, **, 2005. China-Africa Science, Technology and Innovation Collaboration Mammo Muchie, Angathevar Baskaran, Mingfeng Tang, 2024-10-31. This open access book brings together researchers from a variety of disciplines to explore science, technology, and innovation cooperation between China and African countries by using different perspectives. The growing economic, technological, and scientific cooperation between Africa and China provides opportunities to jointly develop mechanisms to provide a skill base from discovery to creativity, invention, innovation, entrepreneurship, and implementation for the benefit of both Africa and China. This book makes a significant contribution to the knowledge, imagination, understanding of the different dimensions of China-Africa STI cooperation and can reach out to all stakeholders with evidence-based research. A Research Report on the Development of China's Manufacturing Sector (2016) Lianshui Li, Zhanyuan Du, 2017-04-09. This book investigates key developments in China's manufacturing industry from the perspectives of general evaluation, regional analysis, industrial analysis, and enterprise analysis. Based on data for 1978 to 2013, it details the characteristics of the different stages, typical development patterns, and the international status of China's manufacturing sector. It also provides an in-depth portrait of China's new type manufacturing sector based on four main aspects: namely, economic creativity, technological innovation capability, energy conservation capability, and environmental protection capability, and subsequently assesses the status quo of this sector, analyzes the regional development characteristics, and ranks China's top 10 provinces and top 10 cities in terms of manufacturing. The book outlines the industrial characteristics of China's manufacturing sector and analyzes the factors influencing its development, and lastly, it examines China's listed manufacturing enterprises, ranking and providing brief snapshots of the top 50 most respected enterprises. This book is intended for all those interested in the development of China's manufacturing sector, especially university instructors and students, governmental officials, and managerial personnel in the manufacturing sector and related enterprises. China's Industrial Technology Shulin Gu, 2004-01-14. Offering a comprehensive review of reform policy followed by an examination of major approaches to institutional restructuring, Shulin Gu explores the way in which China's industrial technology has responded to economic reforms. At the heart of the work is the argument that market reform and organisational change are closely interdependent. Gu outlines the interaction of the two in China and reveals the damage which may result if market reform is not accompanied by new organisational design. Analysis of these issues is drawn from first-hand experience of Chinese technology systems supported by insights from technological innovation, economics, and transaction cost economics. **The Inside Story of China's High-Tech Industry**

Yu Zhou, 2008 In the 1980s China faced the monumental task of creating from scratch internationally competitive companies. This challenge was especially daunting in the information and communications technology sector. The Inside Story of China's High Tech Industry describes the emergence and growth of this industry through an analysis of China's leading science park, Beijing's Zhongguancun. Zhou argues that in the case of China it is the conjunction of export and domestic markets that has provided the main impetus to technological learning and the development of industry competitiveness. This is the best treatment to date of China's most important innovation region.
