D. Timmerhaus,2013-10-14 High pressure has become a basic variable in many areas of science and engineering It extends from disciplines of geophysics and astrophysics through chemistry and physics to those of modern biology electrical and chemical engineering This breadth has been recognized for some time but it was not until the early 1960 s that an international group of scientists and engineers established the Association Internationale for Research and Advancement of High Pressure Science and Technology AIRAPT for bringing these various aspects of high pressure together at an international conference The First AIRAPT International High Pressure Conference was held in 1965 in France and has been convened at approximately two to three year intervals since that time The past four AIRAPT International High Pressure Conferences have been held in Germany Scotland Japan and the U S S R Since the first meeting of this kind our understanding of high pressure behavior of physical systems has increased greatly      **Technical Memorandum** ,1931 Chiefly translations from foreign aeronautical journals      Structural Durability: Methods and Concepts Ruediger Heim,2020-05-29 This book provides methods and concepts which enable engineers to design mass and cost efficient products Therefore the book introduces background and motivation related to sustainability and lightweight design by looking into those aspects from a durability and quality point of view Hence this book gives a top down approach What does an engineer has to do for providing a mass and cost efficient solution A central part of that approach is the stress strength interference model and how to deal with stresses caused by operational loads as well as with the strength of components provided by material design and manufacturing process The basic concepts of material fatigue are introduced but the focus of the volume is to develop an understanding of the content and sequence of engineering tasks to be performed which help to build reliable products This book is therefore aimed specifically at students of mechanical engineering and mechatronics and at engineers in professional practice
