Technological Innovation, Modernity, and Electric Goods in Late State Socialist Poland Patryk Wasiak, 2023-12-15 Technological Innovation Modernity and Electric Goods in Late State Socialist Poland deconstructs the public performance of technological innovation and imagined modernity in relation to the home technologies market in late state socialist Poland While doing so Patryk Wasiak sheds light on the politics that accompanied the modes of representations of the new innovative consumer technologies in the public sphere and the agenda of actors who performed such representations This book argues that the central form of the mediation of home technologies was the projection of specific sociotechnical imaginaries that included visions of how these technologies would have an impact on the creation of a desirable future social order and economy Later such imaginaries were re negotiated and challenged as infeasible or undesirable The author demonstrates how expert groups the industry lobby research institutes and non governmental organizations attempted to secure their role as intermediary actors in order to have a tangible impact on not only the production of commodities but more importantly on the definition of which commodity or a product feature is modern and innovative and which is obsolete

Technology Eric Schatzberg, 2018-11-12 In modern life technology is everywhere Yet as a concept technology is a mess In popular discourse technology is little more than the latest digital innovations Scholars do little better offering up competing definitions that include everything from steelmaking to singing In Technology Critical History of a Concept Eric Schatzberg explains why technology is so difficult to define by examining its three thousand year history one shaped by persistent tensions between scholars and technical practitioners Since the time of the ancient Greeks scholars have tended to hold technicians in low esteem defining technical practices as mere means toward ends defined by others Technicians in contrast have repeatedly pushed back against this characterization insisting on the dignity creativity and cultural worth of their work The tension between scholars and technicians continued from Aristotle through Francis Bacon and into the nineteenth century It was only in the twentieth century that modern meanings of technology arose technology as the industrial arts technology as applied science and technology as technique Schatzberg traces these three meanings to the present day when discourse about technology has become pervasive but confusion among the three principal meanings of technology remains common He shows that only through a humanistic concept of technology can we understand the complex human choices embedded in our modern world
