But during World War II Winston Churchill called Hobart back to Army service with orders to train the now legendary 11th Armored Division. He was then tasked with designing specialist armored fighting vehicles capable of breaching the Atlantic Wall. Known as Hobart's Funnies, these unique vehicles included mine clearing tanks, bridge carrying tanks, flamethrowers, swimming tanks, and amphibious assault vehicles. Operated by Hobart's 79th Armored Division, they played a major part in the D-Day landings and the subsequent European campaigns. Hobart's skills played a significant part in the final Allied victory, and the specialized funnies he introduced to modern warfare have since been adopted by all armies all over the world.

Drawing on official records and personal recollections, historian Richard Doherty tells the incredible story of Percy Hobart and his 79th Armored Division. [Postmodern War](#) Chris Hables Gray, 2013-11-12. Postmodern War poses an urgent challenge to the ways we conceptualize and actually wage war in our high technology age. Computerization and artificial intelligence have brought about a revolution in warfare, spawning both increasingly powerful weapons and a rhetoric which disguises their apocalyptic potential in catch phrases like smart weapons and bloodless combat. Postmodern War examines contemporary practices of war, defining and critiquing trendy military doctrines hidden behind phrases like Infowar and Cyberwar, the roles of those who manipulate high technology, those who are manipulated by it, and those who are increasingly merging with it, the role of peace activists and socially responsible scientists in countering dangerous assumptions made by a postmodern military. Far from opposing technological change, however, Gray finds new hopes for peace in the twenty-first century. Provocative and far-reaching in its scope, the book argues that postmodern war has left us poised between the most dreadful and most utopian of alternatives: we may eradicate either the human race or war itself.

Two Roads to War Robin Higham, 2012-06-15. Noted aviation historian Robin Higham has written this comparative study of the evolution of the French and British air arms from 1918 to 1940 to determine why the Armée de l'Air was defeated in June 1940 but the Royal Air Force was able to win the battle over Britain in September. After analyzing the structure, men, and matériel of the air arms and the government and economic infrastructure of both countries, he concludes that the French force was dominated by the Armée de Terre, had no suitably powerful aero engines, and suffered from the chaos of French politics. In contrast, the independent RAF evolved into a sophisticated, scientifically based force supported by consistent

government practices Higham's thorough examination however finds the British not without error **A Higher Form of Killing** Diana Preston, 2015-02-24 In six weeks during April and May 1915 as World War I escalated Germany forever altered the way war would be fought On April 22 at Ypres German canisters spewed poison gas at French and Canadian soldiers in their trenches on May 7 the German submarine U 20 without warning torpedoed the passenger liner Lusitania killing 1 198 civilians and on May 31 a German Zeppelin began the first aerial bombardment of London and its inhabitants Each of these actions violated rules of war carefully agreed at the Hague Conventions of 1898 and 1907 Though Germany's attempts to quickly win the war failed the psychological damage caused by these attacks far outweighed the casualties The era of weapons of mass destruction had dawned While each of these momentous events has been chronicled in histories of the war celebrated historian Diana Preston links them for the first time revealing the dramatic stories behind each through the eyes of those who were there whether making the decisions or experiencing their effect She places the attacks in the context of the centuries old debate over what constitutes just war and shows how in their aftermath the other combatants felt the necessity to develop extreme weapons of their own In our current time of terror when weapons of mass destruction imagined or real are once again vilified the story of their birth is of great relevance
