needs arising from growing world populations and economic development **Technology responses to global environmental challenges : energy collaboration for the 21st century : Kyoto, Japan, 6th-8th November 1991 conference proceedings** ,1994 **Climate Technology Strategies 1** Pantelis Capros, Leonidas Mantzos, Patrick Criqui, Nikolaos Kouvaritakis, Antonio Soria Ramirez, Leo Schrattenholzer, E. Lakis Vouyoukas, 2012-12-06 The book provides an integrated analysis of the implications for the energy system from adapting to meet climate change targets and analyses the role of improving energy technologies for the world and the EU markets The first part of the book sets the stage for the analysis by presenting the European and World economic and energy outlook The second part examines the policy options available for controlling greenhouse gases in the period to 2010 Over such a relatively short period the role of technology lies mostly in making possible the more efficient use of energy Finally the third part of the volume examines the longer term role of technology in the context of a case study for the power generation sector Climate Change Policy C. J. Jepma, Mohan Munasinghe, 1998 This book concisely sets out the main issues and risks involved in attempting to mitigate climate change

Scientific Integrity and Public Trust United States. Congress. House. Committee on Science. Subcommittee on Energy and Environment, 1996 Acid Precipitation ,1994 *Greenhouse Gas Control Technologies* B. Eliasson, P. Riemer, A. Wokaun, 1999-05-20 These proceedings contain 270 papers outlining ideas and contributions to the new scientific technical and political discipline of Greenhouse Gas GHG Control The contributions were presented at the 4th International Conference on Greenhouse Gas Control Technologies GHGT 4 It was the largest gathering of experts active in this new and fast developing field GHGT 4 was different from its predecessors in that it included all greenhouse gases not only CO₂ and all issues which could contribute to the mitigation of the greenhouse problem technical economic and political The main focus was on practical solutions and real demonstrations of mitigation technology being planned and implemented today It also addressed ways to increase the efficiency of power production and utilisation and looked at proposals to encourage the development of renewable energy sources During the Opening Session 10 keynote addresses were heard from prominent personalities in government industry and academia To tackle this very inter disciplinary problem and to achieve acceptable solutions it is essential for industry and government to initiate intense dialogue and cooperation Conferences like this can provide the opportunity for a meeting of minds between engineers and politicians in the face of global challenge The primary attributes of this global challenge are manifold the problem is global and international it is inter disciplinary both in substance and approach it covers technical political and economic issues and involves government science industry and academia it is complex and non linear and it will take the efforts of all parties involved to solve the problem These proceedings contain ideas for starting demonstration projects and for making better use of the power and flexibility of market measures They also show it is a problem we can influence and that there is a wealth of ideas The challenge now is to find the right partners to put these ideas into action **Greenhouse Gases Bulletin** ,1991 *Science & Technology in*
