Japan's Computer and Communications Industry Martin Fransman, 1995 This work draws on and extends the theoretical framework developed by such authors as Richard Nelson Sidney Winter David Teece Alfred Chandler Nathan Rosenberg and Christopher Freeman through an empirical analysis of the evolution of the Japanese information and communications IC industry Particular attention is paid to the development of a theory of the firm which is consistent with this empirical objective The Japanese IC industry contains three main segments computers and software telecommunications equipment and semiconductors The work asks How did such Japanese companies as NTT NEC Fujitsu Hitachi Toshiba and Sumitomo Electric manage to catch up and become some of the largest companies in the world Why have they not been as successful in global markets as their counterparts in consumer electronics and automobiles What role was played by NTT's system of controlled competition and by MITI Based on over 600 personal interviews over eight years with Japanese leaders this book provides new analyses and empirical material on this crucial industry

Market Distortions in Privatisation Processes Shanker Singham, 2022-12-21 Drawing on a range of global case studies Market Distortions in Privatisation Processes illustrates the ways in which market distortions damaged the ability of privatisation processes to yield concrete benefits to consumers The book compares and contrasts privatisations of state owned enterprises

around the world where competition informed the regulatory design and thus liberated consumer welfare. In particular, the cases are drawn from the electricity and gas sector, the telecoms industry and postal services, each of which has been frequently privatised in different contexts. For each industry, the book explores the UK and US experiences as well as looking at international cases from both developed and developing countries, including where appropriate Japan, Colombia, Romania and Mexico. The emphasis is on analysing the impact that market distortions have had on the outcomes of those privatisations. The book also looks at how public service objectives were achieved and how they too can be designed in pro-competitive or anti-competitive ways. This book will be of significant interest to readers in international business, economics and law.
