Technology in American Water Development Edward Augustus Ackerman, 1967      **Technology in American Water Development** Edward Augustus Ackerman, George O. G. Löf, Conrad Seipp, 1957      **Technology in American Water Development** Edward A. Ackerman, George O.G. Löff, 2013-11-26 Technology in American Water Development is an exploratory study This book addresses the proven technology which has influenced water development in the past those still effective in shaping its course and the emerging technology of today The heart of this study is in the thirty one case descriptions selected from both the emerging and proven technology Each case description has been treated as briefly as is consistent with clarity and nontechnical language has been used wherever possible This title will help to introduce engineers and physical scientists to the administrative problems and opportunities which stem from their works      **Technology in American Water Development** Edward A. Ackerman, George O. Lof, 1977-06-01      Strategies of American Water Management Gilbert White, 2025-10-01 In a country of parching drought stinking streams and muddy floods to use the author's words the management of America's water resources is and promises to remain a vital national issue Yet while there exist many proposed plans and normative studies in the field of water management little attention has been devoted to the analysis of decisions which have actually been made and the projects which have actually been undertaken As Dr White observes it is not common to analyze water resource activity in terms of the character of decisions made and the strategies they reflect The theme of this volume is that by examining how people make their choices in managing water from place to place and time to time we can deepen our understanding of the process of water management and thereby aid in finding more suitable ends and means of manipulating the natural water system In Strategies of American Water Management Dr White outlines a framework in which society's decisions as to water management may be examined and then discusses six of the major strategies which have been practiced in the United States Of each strategy the author asks Who makes what choices What is the effect upon the public welfare What is the effect upon the environment Drawing on personal experience with national and regional water planning efforts Dr White in his analysis points up an emerging shift in man's attitude toward nature the replacement of the view of man as conqueror by the view of harmonizer and co operator This penetrating and informed study by an acknowledged authority in the field constitutes an important contribution toward the intelligent and responsible solution of the problem of American water management      Discussion of Impact of Modern Technology on American Water Development Richard A.
