Technophobia Science Fiction Visions Of Posthuman Technology:

Technophobia! Daniel Dinello, 2006-01-01 Techno heaven or techno hell If you believe many scientists working in the emerging fields of twenty first century technology the future is blissfully bright Initially human bodies will be perfected through genetic manipulation and the fusion of human and machine later human beings will completely shed the shackles of pain disease and even death as human minds are downloaded into death free robots whereby they can live forever in a heavenly posthuman existence In this techno utopian future humanity will be saved by the godlike power of technology If you believe the authors of science fiction however posthuman evolution marks the beginning of the end of human freedom values and identity Our dark future will be dominated by mad scientists rampaging robots killer clones and uncontrollable viruses In this timely new book Daniel Dinello examines the dramatic conflict between the techno utopia promised by real world scientists and the techno dystopia predicted by science fiction Organized into chapters devoted to robotics bionics artificial intelligence virtual reality biotechnology nanotechnology and other significant scientific advancements this book summarizes the current state of each technology while presenting corresponding reactions in science fiction Dinello draws on a rich range of material including films television books and computer games and argues that science fiction functions as a valuable corrective to technological domination countering techno hype and reflecting the weaponized religiously rationalized profit fueled motives of such science By imaging a disastrous future of posthuman techno totalitarianism science fiction encourages us to construct ways to contain new technology and asks its audience perhaps the most important question of the twenty first century is technology out of control

Feminist Posthumanism in Contemporary Science Fiction Film and Media

Julia A. Empey, Russell J.A. Kilbourn, 2023-08-24 Feminist Posthumanism in Contemporary Science Fiction Film and Media From Annihilation to High Life and Beyond places posthumanism and feminist theory into dialogue with contemporary science fiction film and media This essay collection is intimately invested in the debates around the posthuman and the critical posthumanities within a feminist critical theoretical framework In this posthumanist light science fiction as a genre allows for new imaginings of human technological relations while it can also be the site of a critique of human exceptionalism and essentialism In this way science fiction affords unique opportunities for the scholarly investigation of the relevance and relative applicability of specific posthumanist themes and questions in a particularly rich and wide ranging popular cultural field of production One of the reasons for this suitability is the genre's historically longstanding relationship with the critical investigation of gender specifically the position and relative empowerment of women The original analyses presented here pay close attention to audiovisual style including game mechanics facilitating the critical interrogation of the issues and questions around posthumanism Where typically the mention of SF in the posthumanist context calls to mind a whole set of often clichéd tropes the cyborg technologically augmented bodies AI subjectivities etc this volume's thirteen chapters analyze specific examples of contemporary SF cinema that engage in meaningful ways with the burgeoning field of critical

posthumanism and that utilize such films to interrogate posthumanist and feminist as well as humanistic ideas

Cyberbullies, Cyberactivists, Cyberpredators Lauren Rosewarne, 2016-01-25 Written by an expert in media popular culture gender and sexuality this book surveys the common archetypes of Internet users from geeks nerds and gamers to hackers scammers and predators and assesses what these stereotypes reveal about our culture's attitudes regarding gender technology intimacy and identity The Internet has enabled an exponentially larger number of people individuals who are members of numerous and vastly different subgroups to be exposed to one other As a result instead of the simple jocks versus geeks paradigm of previous eras our society now has more detailed stereotypes of the undesirable the under the radar and the ostracized cyberpervs neckbeards goths tech nerds and anyone with a non heterosexual identity Each chapter of this book explores a different stereotype of the Internet user with key themes such as gender technophobia and sexuality explored with regard to that specific characterization of online users Author Lauren Rosewarne PhD supplies a highly interdisciplinary perspective that draws on research and theories from a range of fields psychology sociology and communications studies as well as feminist theory film theory political science and philosophy to analyze what these stereotypes mean in the context of broader social and cultural issues From cyberbullies to chronically masturbating porn addicts to desperate online daters readers will see the paradox in popular culture's message that while Internet use is universal actual Internet users are somehow subpar less desirable less cool less friendly than everybody else **Advancing**

Black Mirror and Philosophy David Kyle Johnson, 2019-12-03 A philosophical look at the twisted high tech near future of the sci fi anthology series Black Mirror offering a glimpse of the darkest reflections of the human condition in digital technology Black Mirror the Emmy winning Netflix series that holds up a dark digital mirror of speculative technologies to modern society shows us a high tech world where it is all too easy to fall victim to ever evolving forms of social control In Black Mirror and Philosophy original essays written by a diverse group of scholars invite you to peer into the void and explore the philosophical ethical and existential dimensions of Charlie Brooker's sinister stories The collection reflects Black Mirror's anthology structure by pairing a chapter with every episode in the show's five seasons including an interactive choose your own adventure analysis of Bandersnatch and concludes with general essays that explore the series broader themes Chapters address questions about artificial intelligence virtual reality surveillance privacy love death criminal behavior and politics including Have we given social media too much power over our lives Could heaven really one day be a place on Earth Should criminal justice and punishment be crowdsourced What rights should a cookie have Immersive engaging and experimental Black Mirror and Philosophy navigates the intellectual landscape of Brooker's morality plays for the modern world where humanity's greatest innovations and darkest instincts collide Crime, Critique and

Utopia Margaret Malloch, Bill Munro, 2013-05-30 This book explores the relevance of utopia in relation to contemporary criminology The range of contributors explore the application of a utopian method for uncovering the potential within criminology and criminal justice as well as the relevance of the utopian impulse for developing a challenge to the status quo in academia and beyond

COVID-19 in International Media John C. Pollock, Douglas A. Vakoch, 2021-08-12 Covid 19 in International Media Global Pandemic Responses is one of the first books uniting an international team of scholars to investigate how media address critical social political and health issues connected to the 2020 21 COVID 19 outbreak The book evaluates unique civic challenges responsibilities and opportunities for media worldwide exploring pandemic social norms that media promote or discourage and how media serve as instruments of social control and resistance or of cooperation and representation These chapters raise significant questions about the roles mainstream or citizen journalists or netizens play or ought to play enlightening audiences successfully about scientific information on COVID 19 in a pandemic that magnifies social inequality and unequal access to health care challenging popular beliefs about health and disease prevention and the role of government while the entire world pays close attention This book will be of interest to students and faculty of communication studies and journalism departments of public health sociology and social marketing

Science Fiction and Computing David L. Ferro, Eric G. Swedin, 2011-09-29 The prevalence of science fiction readership among those who create and program computers is so well known that it has become a cliché but the phenomenon has remained largely unexplored by scholars What role has science fiction played in the actual development of computers and computing And likewise how has computing including the related fields of robotics and artificial intelligence affected the course of science fiction The 18 essays in this critical work explore the interrelationship of these domains over the span of more than half a century

A Genealogy of Cyborgothic Dongshin Yi, 2017-03-02 In his provocative and timely study of posthumanism Dongshin Yi adopts an imaginary imaginative approach to exploring the transformative power of the cyborg a strategy that introduces balance to the current discourses dominated by the practicalities of technoscience and the dictates of anthropocentrism Proposing the term cyborgothic to characterize a new genre that may emerge from gothic literature and science fiction Yi introduces mothering as an aesthetic and ethical practice that can enable a posthumanist relationship between human and non human beings Yi examines the cyborg's literary manifestations in novels including The Mysteries of Udolpho Frankenstein Dracula Arrowsmith and He She and It alongside philosophical and critical texts such as Edmund Burke's A Philosophical Enquiry into the Origins of Our ideas of the Sublime and Beautiful Immanuel Kant's Critique of Judgment John Stuart Mill's Utilitarianism and System of Logic William James's essays on pragmatism ethical treatises on otherness and things feminist writings on motherhood and recent studies of posthumanism Arguing humans imagine the cyborg in ways that are seriously limited by fear of the unknown and current understandings of science and technology Yi identifies in gothic literature a practice of the beautiful that extends the operation of sensibility heightened by gothic

manifestations or situations to surrounding objects and people so that new feelings flow in and attenuate fear In science fiction which demonstrates how society has accommodated science Yi locates ethical corrections to the anthropocentric trajectory that such accommodation has taken Thus A Genealogy of Cyborgothic imagines a new literary genre that helps envision a cyborg friendly non anthropocentric posthuman society Encoded with gothic literature s aesthetic embrace of fear and science fiction s ethical criticism of anthropocentrism the cyborgothic retains the prospective nature of these genres and develops mothering as an aesthetico ethical practice that both humans and cyborgs should perform *Net Privacy* Sacha Molitorisz,2020-05-21 In our digital world we are confused by privacy what is public what is private We are also challenged by it the conditions of privacy so uncertain we become unsure about our rights to it We may choose to share personal information but often do so on the assumption that it won t be re shared sold or passed on to other parties without our knowing In the eighteenth century philosopher Jeremy Bentham wrote about a new model for a prison called a Panopticon where inmates surrounded the jailers always under watch Have we built ourselves a digital Panopticon Are we the guards or the prisoners captive or free Can we be both When Kim Kardashian makes the minutiae of her life available online which is she With great rigour this important book draws on a Kantian philosophy of ethics and legal frameworks to examine where we are and to suggest steps conceptual and practical to ensure the future is not dystopian Privacy is one of the defining issues of our time this lively book explains why this is so and the ways in which we might protect it *Communication of Migration in Media and Arts* Vildan MAHMUTOĞLU,John Morán GONZÁLEZ,2020-10-23 The main function of traditional media is to provide timely information to the public but today traditional media cannot fulfill these expectations with regard to the fluid nature of global migration New digital media technologies such social media have arisen to fill the void narrating the lives of migrants in artistic terms that bear the traces of the major social issues of migration In this critical anthology contributors examine the intersection of migration art and media studies in order to critically analyse the impact of their confluence upon migrant and receiving communities Vildan Mahmuto lu is Associate Professor at Galatasaray University Istanbul Her research interests include migration local cultures gender and minorities Her published book chapters include A Glimmer of Hope for Mass Media in a Liberal democracy istanbulrumazinligi com and Global media Entertainment star search Her current research is about gender in diaspora John Mor n Gonz lez is the J Frank Dobie Regents Professor of American and English Literature at the University of Texas at Austin where he is also Director of the Center for Mexican American Studies He is author of two monographs and the edit or or c o editor of thr ee anthologies Contents Introduction Vildan Mahmuto lu and John Moran Gonzalez CHAPTER 1 Representation of Asylum seekers in Science Fiction films Prawns in District 9 Vildan Mahmuto lu CHAPTER 2 Border Imagery and Refugee Abjection in Contemporary Visual Art Balca Arda CHAPTER 3 Manifestations of Transfer in the Latest Post Yugoslav Playwriting and Theatre Migration Cultural Mobility and Transculturality Gabriela Abrasowicz CHAPTER 4 Migrants Identity and Body Modification in Biblical and Ancient Near

Eastern Media Eric Trinko CHAPTER 5 The new diaspora and interactive media campaigns The case of Romanians migrating to the UK after Brexit Bianca Florentina Cheregi CHAPTER 6 Social Media and ICT Use by refugees Immigrants and NGOs A Literature Overview Bilgen T rkay CHAPTER 7 Reproduction of Desire Overuse of Social Media Among Syrian Refugees and Its Effects on The Future Imagination Bar ktem *Being Brains* Fernando Vidal, Francisco Ortega, 2017-07-04 This interesting informative and provocative book explores the pervasive influence of neuroscience and the view that we are essentially our brains History and Philosophy of the Life Sciences *Being Brains* offers a critical exploration of neurocentrism the belief that we are our brains which came to prominence in the 1990s Encouraged by advances in neuroimaging the humanities and social sciences have gravitated toward the brain as well developing neuro subspecialties in fields such as anthropology aesthetics education history law sociology and theology Even in the business world dubious enterprises such as neuromarketing and neurobics have emerged to take advantage of the heightened sensitivity to all things neuro While neither hegemonic nor monolithic the neurocentric view embodies a powerful ideology that is at the heart of some of today s most important philosophical ethical scientific and political debates *Being Brains* examines the internal logic of this new ideology as well as its genealogy and its main contemporary incarnations *Being Brains* was chosen as the 2018 Outstanding Book in the History of the Neurosciences by the International Society for the History of the Neurosciences *In Robots We Trust* Samuele Vinanzi, 2025-08-01 *In Robots We Trust* explores the evolving relationship between humans and intelligent machines focusing on the critical issue of trust As robots become more integrated into our daily lives from self driving cars to delivery drones our society faces a critical question can we trust them Without requiring technical or mathematical expertise the reader is introduced to the sciences of artificial intelligence and robotics addressing philosophical debates about machine intelligence and cognition It examines the psychological moral and ethical issues unique to human robot interactions and the factors that influence our acceptance of these machines such as their appearance behaviour and our own cultural backgrounds However trust is a mutual relationship *In Robots We Trust* presents the groundbreaking concept of Artificial Trust where robots are empowered to decide whether to trust humans Through real world examples of contemporary scientific experiments in cognitive robotics the book reveals the significant impact of these ideas for our future **Theology and Westworld** Juli Gittinger, Shayna Sheinfeld, 2020-07-15 In the first two seasons of the HBO series *Westworld* human guests pay exorbitant fees to spend time among cybernetic Hosts partially sentient AI robots and live out often violent fantasies In *Theology and Westworld* scholars from a range of disciplines within religious studies examine the profound questions that arise when the narrative of *Westworld* interacts with the study of religion From transhumanism and personhood to morality and divinity this book contributes to confounds and challenges ideas that are found in the study of religion and philosophy Taken together the chapters further our understanding of what it means to live in a world where the hard questions of human existence are explored through the medium of popular culture *Stop the Machines* Mauro

Lubrano,2025-07-11 As we stand on the cusp of an AI revolution will we see the rise of a new anti technology extremism that threatens to dismantle the gains of modern civilization In the first exploration of this phenomenon Mauro Lubrano traces the origins and evolution of anti technology violence across the globe He identifies three main groups fuelling such resistance insurrectionary anarchists eco extremists and eco fascists Exploring the justifications that underlie the opposition to technology and the strategies employed to stop the machines he shows how anti tech extremism has emerged as a reaction to the Anthropocene an attempt to undo the epoch of human domination The intellectual flexibility of this ideology lends itself to different causes from the class struggle against the techno elites to the defence of nature and white supremacy With fears about the risks of artificial intelligence mounting and the world beset by serious polycrises what is currently a fragmented fringe phenomenon holds the potential for dramatic escalation *Nature-Inspired Intelligent Techniques for Solving Biomedical Engineering Problems* Kose, Utku,Guraksin, Gur Emre,Deperlioglu, Omer,2018-03-31

Technological tools and computational techniques have enhanced the healthcare industry These advancements have led to significant progress and novel opportunities for biomedical engineering *Nature Inspired Intelligent Techniques for Solving Biomedical Engineering Problems* is a pivotal reference source for emerging scholarly research on trends and techniques in the utilization of nature inspired approaches in biomedical engineering Featuring extensive coverage on relevant areas such as artificial intelligence clinical decision support systems and swarm intelligence this publication is an ideal resource for medical practitioners professionals students engineers and researchers interested in the latest developments in biomedical technologies

Intimacy on the Internet Lauren Rosewarne,2016-04-14 The focus of this book is on the media representations of the use of the Internet in seeking intimate connections be it a committed relationship a hook up or a community in which to dabble in fringe sexual practices Popular culture film narrative television the news media and advertising present two very distinct pictures of the use of the Internet as related to intimacy From news reports about victims of online dating to the presentation of the desperate and dateless the perverts and the deviants a distinct frame for the intimacy Internet connection is negativity In some examples however a changing picture is emerging The ubiquitousness of Internet use today has meant a slow increase in comparatively more positive representations of successful online romances in the news resulting in more positive spin advertising and a more even handed presence of such liaisons in narrative television and film Both the positive and the negative media representations are categorised and analysed in this book to explore what they reveal about the intersection of gender sexuality technology and the changing mores regarding intimacy **Interrogating Boundaries of**

the Nonhuman Sune Borkfelt,Matthias Stephan,2022-05-23 *Interrogating Boundaries of the Nonhuman Literature Climate Change and Environmental Crises* asks whether literary works that interrogate and alter the terms of human nonhuman relations can point to new more sustainable ways forward Bringing insights from the field of literary animal studies a diverse and international group of scholars examine literary contributions to the ecological framing of human nonhuman

relationships Collectively the contributors to this edited collection contemplate the role of literature in the setting of environmental agendas and in determining humanity's path forward in the company of nonhuman others

Critical Directions in Comics Studies Thomas Giddens, 2020-08-25 Contributions by Paul Fisher Davies Lisa DeTora Yasemin J Erden Adam Gearey Thomas Giddens Peter Goodrich Maggie Gray Matthew J A Green Vladislav Maksimov Timothy D Peters Christopher Pizzino Nicola Streeten and Lydia Wysocki Recent decades have seen comics studies blossom but within the ecosystems of this growth dominant assumptions have taken root assumptions around the particular methods used to approach the comics form the ways we should read comics how its system works and the disciplinary relationships that surround this evolving area of study But other perspectives have also begun to flourish These approaches question the reliance on structural linguistics and the tools of English and cultural studies in the examination and understanding of comics In this edited collection scholars from a variety of disciplines examine comics by addressing materiality and form as well as the wider economic and political contexts of comics creation and reception Through this lens influenced by poststructuralist theories contributors explore and elaborate other possibilities for working with comics as a critical resource consolidating the emergence of these alternative modes of engagement in a single text This opens comics studies to a wider array of resources perspectives and modes of engagement Included in this volume are essays on a range of comics and illustrations as well as considerations of such popular comics as Deadpool Daredevil and V for Vendetta and analyses of comics production medical illustrations and original comics Some contributions even unfold in the form of comics panels

A Tale Told by a Machine Heather Duerre Humann, 2023-05-08 Intelligent machines have long existed in science fiction and they now appear in mainstream films such as Bladerunner Ex Machina I Am Mother and Her as well as in a recent proliferation of literary texts narrated from the machine's perspective These new portrayals of artificial intelligence inevitably foreground dilemmas related to identity and selfhood concepts being reassessed in the 21st century Taking a close look at novels like Ancillary Justice Aurora All Systems Red The Actuality The Unseen World and Klara and the Sun this work investigates key questions that arise from the use of AI narrators It describes how these narratives challenge humanist principles by suggesting that selfhood is an illusion even as they make the case for extending these principles to machines by proposing that they are not so different from humans The book examines what is at stake with nonhuman narration the qualities of AI narratives and what it might mean to relate to a narrator when the voice adopted is that of an AI
