Congress. Senate. Committee on Commerce, Science, and Transportation,2006 *Designing Incentive Regulation for the Telecommunications Industry* David E. Sappington,Dennis L. Weisman,1996 This book applies new advances in economic theory regarding the asymmetry of information between firms and their regulators to the design of improved telecommunications regulation *Liberalization and Regulation of the Telecommunications Sector in Transition Countries* Ekaterina Markova,2008-11-14

Telecommunications are increasingly recognized as a key component in the infrastructure of economic development For many years there were state owned monopolies in the telecommunications sector In transition economies they were characterized by especially poor performance and high access deficits as telecommunications were considered to be a non profit oriented production process intended to support the socio economic superstructures As a result the starting point for the reform processes in transition countries was quite poor performed public monopolies functioned under completely different circumstances as the peers in the market economies The main question of this book is what the strategies for the successful future development of the telecommunications sector in transition countries are The special focus is on Russia the largest of the transition countries **The Future of Telecommunications Industries** Arnold Picot,2006-07-25

Communication is a crucial basis for the development of each individual s social identity as well as for intellectual and commercial exchange and economic development Therefore the question is not whether telecommunications industries have a future but what kind of future old and new players will have given the dynamic changes in technologies and markets with various opportunities challenges and discontinuities This book contains the results of a Transatlantic Symposium organized by the M NCHNER KREIS and supported by Georgetown University and its BMW Center for German and European Studies The symposium combined perspectives from industrial practice and academic research originating from North America and Europe Key issues were the technological drivers of change changing market structures and business models and the nature of future regulation on telecom markets **Competition Policy in the Telecommunications Industry** United States.
