advice on the potential opportunities as well as legal consequences or pitfalls in the conduct and expansion of the telecoms business in Europe Written on a country by country basis each chapter is contributed by a telecommunications expert from their respective country All chapters follow the same format and cover the same topics allowing comparative analyses The reader has an all in one report on the current legal status of the telecom markets in European countries to save them valuable research time to ensure they have a clear idea of the business opportunities in the telecommunications sector of each country

Regulating Telecommunications in the EU and China Bernd Holznagel, Junqi Xu, Thomas Hart, 2009 Chinese as well as European regulatory decisions need to consider regional particularities but insist on an implementation system that never loses sight of its goal In the area of electronic communications policy this goal is the establishment of a market environment that ensures innovation high quality and affordable prices The present survey aims at improving the process of knowledge exchange between European and Chinese experts and decision makers in Information Society law and policy The EU China Information Society Project asked the authors to assess both the EU's and the Chinese status quo and to bring together both perspectives together in a joint effort to learn from the EU experiences for the Chinese decision making process today

EC Competition and Telecommunications Law Andreas Bartosch, Jens-Daniel Braun, 2009-01-01 This new volume updates the groundbreaking analysis of its first edition in 2002 when the EC common regulatory framework for electronic communications networks and services had just entered into force So much has changed in the intervening years that that this new edition bears little resemblance to its predecessor with every chapter either extensively altered or entirely new It remains however the most detailed and comprehensive overview available of the application of the EC Treaty's competition rules in the markets for telecommunications and audiovisual media and of the applicable regulatory framework In thirteen chapters each contributed by one or more noted legal authorities in the field the second edition of EC Competition and Telecommunications Law covers the full range of EC telecommunications law across all major areas of both institutional and substantive law both on the international and EC levels including the following State aid the merger control regulation justification for sector specific regulation in EC competition law network access authorizations and privileges and mobile telephony Relevant EC media and communications law and relevant aspects of EC competition law are dealt with in detail While some chapters focus on competition law others deal primarily with sector specific regulation There is practical guidance throughout on procedural matters alongside analysis of the substantive provisions Well known in its first edition this thoroughly revised and updated version continue to be vital reading for practitioners in particular those specializing in European competition law and for company and in house lawyers who are seeking advice on how European law affects their business As a detailed analysis of the basic legislative and regulatory framework of European telecommunications law it will be an invaluable reference work for lawyers judges regulators and policymakers in all the EC Member States as well as for students and teachers of European law

Telecommunications Law and Regulation Ian Walden, 2009-02-19 Since the last

edition of the book was published there have been a number of important developments in the telecommunications industry for example the operational separation of BT in the UK which may prove a model for the rest of Europe in dealing with incumbent operators and the debate over network neutrality in the US which is dominating the roll out of the infrastructure Telecommunications Law and Regulation is fully updated and contains new chapters on technology and markets and capacity agreements Other topics addressed in this new edition include the consequences of convergence within an EU and international context including the blurring of conduit and content regulations the implications of IP and Next Generation Networks issues of communication privacy in the context of the war on terrorism and how these impact on the commercial operations of service providers the obtaining and trading of spectrum with governments and regulators looking to fully exploit the digital dividend and the application of ex post competition law to the sector as governments attempt to deregulate competitive markets The book examines all aspects of EU 2003 regime implementation issues and the proposed reforms arising from the 2006 review Written by leading experts in the field it offers comprehensive coverage of the law and regulatory structures relating to telecommunications It is essential reading for legal practitioners involved in the telecommunications industry and of interest to management consultants bankers and accountants who will need to be aware of the legal implications of this fast changing area It is also a highly accessible and thought provoking book for postgraduate study

International Telecommunications Law and Policy Uchenna Jerome Orji, 2019-01-18 Since the revolution in modern telecommunications that followed the invention of the telegraph telecommunication networks have provided channels for the fast delivery of communications across national borders This transnational nature of telecommunication networks have led to the establishment of international regulatory regimes on the subject On the other hand developing countries consider regional economic integration as a major strategy for promoting trade and development telecommunications have been seen within this context as a strategic tool for facilitating regional economic integration This has also led to the establishment of regional telecommunication regulatory regimes that aim to promote regional integration and regulatory harmonization This book discusses telecommunication regimes established by international and regional organizations such as the United Nations the International Telecommunication Union the World Trade Organization the African Union the Economic Community of West African States and the Southern African Development Community among a number of others It will be relevant to policy makers regulators

lawyers law students investors and telecommunication operators as well as any person interested in international and African regional telecommunication regimes **Telecommunications Law and Regulation** Ian Walden,2022-12-15 This new edition of the leading international text on telecommunications law captures recent legal and regulatory developments in the telecommunications sector at a national European and international level Written by leading experts it is essential reading for legal practitioners and academics involved in the telecommunications industry **EU Competition Law and the Information and Communication Technology Network Industries** Andrej Fatur,2012-03-08 Competition policies have long been based on a scholarly tradition focused on static models and static analysis of industrial organisation However recent developments in industrial organisation literature have led to significant advances moving beyond traditional static models and a preoccupation with price competition to consider the organisation of industries in a dynamic context This is especially important in the field of information and communication technology ICT network industries where competition centres on network effects innovation and intellectual property rights and where the key driver of consumer benefit is technological progress Consequently when an antitrust intervention is contemplated a number of considerations that arise out of the specific nature of the ICT sector have to be taken into account to ensure improved consumer welfare This book considers the adequacy of existing EU competition policy in the area of the ICT industries in the light of the findings of modern economic theory Particular attention is given to the implications of these dynamic markets for the competitive assessment and treatment of the most common competitive harms in this area such as non price predatory practices tying and bundling co operative standard setting platform joint ventures and co operative R D Competition Law and Regulation of the EU Electronic Communications Sector Liyang Hou,2012-09-01 This book brings satisfying definition and clarity to this field at last Exploring the substantive differences between competition law and sector specific regulation after the methodological integration it presents the first detailed analysis of the many hundreds of notifications and Commission letters generated under the Article 7 procedure identifying the most relevant cases dealing with market definition market power and remedies It compares these decisions with relevant competition law cases and highlights elements with a bearing on sector specific regulation It also offers hugely valuable guidance through the vast amount of documents in the Commission s CIRCA database Topics and issues raised include the following definition of product markets delineation of geographic markets including sub national different practices in relation to assessing single market power and collective market power and competition problems such as refusal to deal margin squeeze non price discrimination and excessive pricing There can be little doubt that this is the new reference point for researchers and practitioners in this domain By systematically categorizing the concepts and legal criteria and building a solid theoretical framework on the intersection of competition law and sector specific regulation the author has created a resource that is sure to be welcomed by all those involved in regulation of electronic communications markets and network industries in general academic scholars

telecommunications regulators at the EU and Member State levels competition authorities law firms specializing in IT communications law practitioners in IT and telecommunications companies and consultants in the sector The book will also prove very useful for scholars and practitioners in other parts of the world interested in comparing the EU system with their own

Telecommunications Law and Regulation Ian Walden, 2012-09-13 Since the last edition of the book was published there have been a number of important developments in the telecommunications industry Telecommunications Law and Regulation takes these changes into account including an examination of the EU New Regulatory Framework as well as the establishment of the Body of European Regulators for Electronic Communications BEREC There are also new chapters on spectrum management radio frequencies and consumer protection rules The access and interconnection chapter addresses the issues surrounding the high capacity broadband widely provided by Next Generation Networks The chapter on licensing and authorisation has been refocused to reflect the increasing regulatory focus on the mobile sector The chapter on regulating content has also been significantly restructured and revised to reflect the changes in how we consume content Written by leading experts it is essential reading for legal practitioners and academics involved in the telecommunications industry

European Telecommunications Liberalisation Kjell A. Eliassen, Marit Sjøvaag Nfa, Marit Sjøvaag, 2013-03-04 This book examines the process and consequences of telecommunications liberalisation in the context of an ever closer European Union The creation of a single market for telecommunications and of a wider European single market mirror one another Telecommunications are also something of a test case for the privatisation process as this sector has traditionally been a state monopoly The volume approaches the European experience from three angles the politics of regulation and the process of liberalisation in the EU including case studies of the UK France and Germany increasing global economic interdependence makes international comparisons essential and the volume compares the EU experience with that of the Czech Republic Israel and Thailand the consequences of technology and continuous innovation
