Telecommunications In Africa:

Telecommunications and Development in Africa B. A. Kiplagat, Marcel C. M. Werner, 1994 This publication views Africa in a global perspective in economic regulatory and technological terms Arguments are offered for ensuring that Africa keeps pace with global technology as the rest of the world is gearing towards multimedia communications and the associated productivity gains

Telecommunications in Africa Eli M. Noam, 1999-02-25 A modern telecommunications network is an essential infrastructure for the world's developing nations The emergence of new technologies the entrance of supra national carriers and deregulation in the telecommunications sector have resulted in the globalization of telecommunications and the opening of markets on every continent Collecting the work of 19 expert contributors this book provides a comprehensive examination of what African countries are doing to build their telecommunications capabilities Africa has historically lagged behind other regions in developing its telecommunications infrastructure and the penetration rate for basic service is still relatively low But as some African nations undergo restructuring they have begun to open their networks to foreign investors and regional cooperative ventures to expand basic and advanced telecommunications services The contributors discuss the uneven pace of economic regulatory and social change among African nations as state telecommunications monopolies maintain their hold in some countries and give way to privatization in others Analyzing the political and economic changes of the 1990s the contributors provide clues about how Africa can shake off decades of inertia and prepare to take part in the global information economy Edited by an internationally recognized authority on telecommunications this volume is the latest in a series that surveys telecommunications in the major regions of the world Thorough and accessible it is a valuable resource for students and scholars in the areas of communications economics regulatory law telecommunications engineering and African studies as well as telecommunications professionals and policy makers

Regulating Telecommunications in South Africa Charley Lewis, 2020-06-10 This book provides the first full account of the 20 year story of universal access and service in South Africa's ICT sector From 1994 the country's first democratic government set

out to redress the deep digital divide afflicting the overwhelming majority of its citizens already poor and disenfranchised but likewise marginalised in access to telephone infrastructure and services By this time an incipient global policy regime was driving reforms in the telecomms sector and also developing good practice models for universal service Policy diffusion thus led South Africa to adopt adapt and implement a slew of these interventions In particular roll out obligations were imposed on licensees and a universal service fund was established But an agency with a universal service mandate was also created and licences in under serviced areas were awarded The book goes on to identify and analyse the policy success and failure of each of these interventions and suggests some lessons to be learned

The Liberalisation of the Telecommunications Sector in Sub-Saharan Africa and Fostering Competition in Telecommunications Services Markets Rachel Alemu, 2018-02-02 This study investigates whether the existing regulatory framework governing the telecommunications sector in countries in Sub Saharan Africa effectively deals with emerging competition related concerns in the liberalised sector Using Uganda as a case study it analyses the relevant provisions of the law governing competition in the telecommunications sector and presents three key findings Firstly while there is comprehensive legislation on interconnection and spectrum management inefficient enforcement of the legislation has perpetuated concerns surrounding spectrum scarcity and interconnection Secondly the legislative framework governing anti competitive behaviour though in line with the established principles of competition law is not sufficient Specifically the framework is not equipped to govern the conduct of multinational telecommunications groups that have a strong presence in the telecommunications sector Major factors hampering efficient competition regulation include Uganda's sole reliance on sector specific competition rules restricted available remedies and a regulator with limited experience of enforcing competition legislation The weaknesses in the framework strongly suggest the need to adopt an economy wide competition law Lastly wireless technology is the main means through which the population in Uganda accesses telecommunications services Greater emphasis should be placed on regulating conduct in the wireless communications markets

Telecommunications in Africa Sophie Gigliotti, 2003 **Trade and Investment in Africa** United States. Congress. Senate. Committee on Foreign Relations. Subcommittee on African Affairs, 1995 Distributed to some depository libraries in microfiche Perspectives on Africa-China Infrastructural and Industrial Cooperation Bhaso Ndzendze, David Monyae, 2023-10-19 This edited volume discusses infrastructural cooperation and industrial cooperation between China and several countries in Africa In contributions by academics and practitioners alike the book distils the conceptual implications of empirical and ethnographic findings and explores probable future developments in the Africa China relationship The

chapters deal with numerous countries across the African continent covering nearly all regions showcasing the dynamics of China's relations with different countries while highlighting African agency over major infrastructure projects and industrial activity. Providing an in-depth look at the evolving economic cooperation across these two regions, this volume will appeal to researchers and students of African politics, international relations, area studies, and comparative politics. The book will be of relevance to policymakers in governments, international organizations, and non-governmental organizations involved in policy formulation, particularly regarding the Africa-China relationship.

Media in Africa Toks Dele Oyedemi, René A. Smith, 2024-05-20

A comprehensive and accessible introduction, this book examines a range of issues pertaining to the theory, history, and critiques of media in Africa. Featuring contributions from global scholars that represent both new and established voices on the African continent and the diaspora, this volume explores themes of decolonization, media freedom, media censorship, identity, representation, pluralism, media framing, political economy of the media, with emphasis on ownership, market trends, and transnational media operations in Africa. Contributors explore these and other topics across a variety of media tiers, types, genres, and platforms. The book also features contributions from practicing journalists and media practitioners working in Africa, providing students with hands-on knowledge from the field.
