Evolution of Information Technology in Educational Management Arthur Tatnall, Adrie J. Visscher, Andrew Finegan, Christopher O'Mahony, 2009-04-01 Evolution of Information Technology in Educational Management As the editors of this volume we are very happy to publish a selection of the papers that were presented at the eighth Conference of Working Group 3.7 of the International Federation for Information Processing which was held in July 2008 The focus of Working Group 3.7 is on ITEM Information Technology in Educational Management for more information please visit our website <http://item.wceruw.org> and the theme of its 2008 conference was on the Evolution of Information Technology in Educational Management Our Working Group started its activities officially we were not an IFIP Working Group at that time in 1994 in Israel so it made sense to look at how ITEM has evolved over the years and to reflect on what its future may be The conference took place in Darwin northern Australia which even during the Australian winter is a very pleasant location for having a conference The town of Darwin was given its name by the Captain of the Beagle the ship on which Darwin travelled when he made the investigations on which he based his Theory of Evolution who came to the area and named the town after the giant of science he admired *Kicking Butt in Computer Science* Carol Frieze, Jeria Quesenberry, 2015-11-30 Are women really kicking butt in computer science National statistics show little progress in the participation of women in computing this in spite of numerous studies reports and recommendations on the topic Some might say the reasons for the situation remain a mystery However at Carnegie Mellon University we do not believe that the situation is either so mysterious or such an intractable problem Indeed women are kicking butt in computer science in some cultures and environments This book tells the Carnegie Mellon story a positive story of how one school developed a culture and environment in which both women and men could thrive and be successful in computer science E-Training Practices for

Professional Organizations Paul Nicholson, J. Barrie Thompson, Mikko Ruohonen, Jari Multisilta, 2010-04-08 E Training Practices for Professional Organizations is an essential reference for anyone interested in the integration of e business e work and e learning processes The book collects for the first time the proceedings from the 2003 IFIP eTrain Conference held in Pori Finland The text serves as a multi disciplinary resource for information on the research development and applications of all topics related to e Learning The first half of the book discusses theories paradigms and their applications in academia and industry The last half of the book examines learning environments design issues and collaboration among the corporate governmental and academic sectors With academic and professional contributors E Training Practices for Professional Organizations reflects the multi faceted and exciting nature of e training studies This volume presents the balanced view of past developments and current research necessary to truly reach the potential of this burgeoning field

Knowledge Management for Educational Innovation Arthur Tatnall, Toshio Okamoto, Adrie Visscher, 2007-02-23 This book contains selected papers presented at the seventh Conference on Working Group 3.7 of the International Federation for Information Processing The focus of Working Group 3.7 is on ITEM Information Technology in Educational Management The overall goal of the conference was to demonstrate and explore directions for developing and improving all types of educational institutions through ITEM

Management of Education in the Information Age Ian D. Selwood, A. Fung, Christopher D. O'Mahoney, 2012-12-06 At two previous conferences of Working Group 3.7 the evaluation of the implementation of computerised school information systems SISs in Hong Kong and The Netherlands were presented Here we will present the results of similar research in England The rationale for these studies was to fill the gap in our knowledge on this important type of computer use in schools and by that to gain insight into the factors that prove to promote successful SIS implementation In England SIMS School Information Management System has the largest market share of computerised school administration systems SIMS is a modular but integrated system in that once entered data is available between modules Briefly SIMS consists of about twenty modules that support the work of clerical staff and school managers and teachers for details see Wild The user opinion on the quality of SIMS The nature and effects of the implementation process and the characteristics of the schools into which SIMS was introduced Factors affecting the degree of SIMS use The variables relating to the above issues that were investigated in this study fell into five distinct categories according to Visscher's model see Figure 1 i.e. features of SIMS use the implementation process school organisation and the intended/unintended effects The study assumed possible interrelationships between all these variable groups
