City of Bits William J. Mitchell,1996-07-25 Entertaining concise and relentlessly probing City of Bits is a comprehensive introduction to a new type of city an increasingly important system of virtual spaces interconnected by the information superhighway William Mitchell makes extensive use of practical examples and illustrations in a technically well grounded yet accessible examination of architecture and urbanism in the context of the digital telecommunications revolution the ongoing miniaturization of electronics the commodification of bits and the growing domination of software over materialized form

Smart Cities for Sustainability Mohammed El Amine Abdelli,Asma

Sghaier,Atilla Akbaba,Samia Chehbi Gamoura,Hamid Doost Mohammadian,2023-12-11 As decision makers apply digitalization in global cities to achieve their SDG goals contributors from around the world here shed light on forthcoming developments in Smart Cities and set out how to plan for increasingly rapid changes

Proceedings of the 10th

International Conference on Intellectual Capital, knowledge Management and Organisational Learning Dr Annie Green,2013-01-09

Springer Handbook of Geographic Information Wolfgang Kresse,David M. Danko,2012-02-21 Computer science provides a powerful tool that was virtually unknown three generations ago Some of the classical fields of knowledge

are geodesy surveying cartography and geography Electronics have revolutionized geodetic methods Cartography has faced the dominance of the computer that results in simplified cartographic products All three fields make use of basic components such as the Internet and databases The Springer Handbook of Geographic Information is organized in three parts Basics Geographic Information and Applications Some parts of the basics belong to the larger field of computer science However the reader gets a comprehensive view on geographic information because the topics selected from computer science have a close relation to geographic information The Springer Handbook of Geographic Information is written for scientists at universities and industry as well as advanced and PhD students

Intelligent Cities and Globalisation of Innovation

Networks Nicos Komninos, 2008-07-17 Intelligent Cities and Globalisation of Innovation Networks combines concepts and theories from the fields of urban development and planning innovation management and virtual intelligent environments It explains the rise of intelligent cities with respect to the globalisation of systems of innovation opens up a new way for making intelli

Knowledge Cities Francisco Carrillo, 2006-08-14 Knowledge Cities are cities that possess an economy driven by high value added exports created through research technology and brainpower In other words these are cities in which both the private and the public sectors value knowledge nurture knowledge spend money on supporting knowledge dissemination and discovery ie learning and innovation and harness knowledge to create products and services that add value and create wealth Currently there are 65 urban development programs worldwide formally designated as knowledge cities Knowledge based cities fall under a new area of academic research entitled Knowledge Based Development which brings together research in urban development and urban studies and planning with knowledge management and intellectual capital In this book Francisco Javier Carillo of the Monterrey Institute of Technology ITESM brings together a group of distinguished scholars to outline the theory development and realities of knowledge cities Based on knowledge based development the book shows how knowledge can be and is placed at the center of city planning and economic development to enable knowledge flows and innovation to provide a sustainable environment for high value added products and services
