Mathematics or Science Curriculum Programs National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Science Education K-12 and the Mathematical Sciences Education Board, 1999-12-15 With the publication of the National Science Education Standards and the National Council of Teachers of Mathematics Curriculum and Evaluation Standards for School Mathematics a clear set of goals and guidelines for achieving literacy in mathematics and science was established Designing Mathematics or Science Curriculum Programs has been developed to help state and district level education leaders create coherent multi year curriculum programs that provide students with opportunities to learn both mathematics and science in a connected and cumulative way throughout their schooling Researchers have confirmed that as U S students move through the grade levels they slip further and further behind students of other nations in mathematics and science achievement Experts now believe that U S student performance is hindered by the lack of coherence in the mathematics and science curricula in many American schools By structuring curriculum programs that capitalize on what students have already learned the new concepts and processes that they can learn will be richer more complex and at a higher level Designing Mathematics or Science Curriculum Programs outlines Components of effective mathematics and science programs Criteria by which these components can be judged A process for developing curriculum that is structured focused and coherent Perhaps most important this book emphasizes the need for designing curricula across the entire 13 year span that our children spend in elementary and secondary school as a way to improve the quality of education Ultimately it will help state and district educators use national and state standards to design or re build mathematics and science curriculum programs that develop new ideas and skills based on earlier ones from lesson to lesson unit to unit year to year Anyone responsible for designing or influencing mathematics or science curriculum programs will find this guide valuable **The Rainbow of Mathematics** Jaine Kopp, Lincoln Bergman, 1999 Presents the main ideas and current approaches in inquiry based content rich mathematics education Matter Kevin Beals, Carolyn Willard, 2007 Students learn fundamental concepts about matter and overcome common misconceptions through a series of engaging investigations each followed by a lively discussion based on evidence they have gathered The activities in this guide help teachers build a foundation of inquisitiveness and develop solid science concepts in students Activities reinforce an understanding of the states of matter as students examine real world materials some resistant to categorization and find ways to define each as solid liquid or gas **Elephants and Their Young** Jean C. Echols, 2001 Youngsters learn about the elephant's structure and function family interactions and its habitat Life science math and physical science are tightly integrated with language development in this unit **Animal Defenses** Jean C. Echols, 2003-07 Young children learn about

the defensive structures and defensive behaviors of dinosaurs and of familiar animals today *Investigating Artifacts*
 Katharine Barrett,Gigi Dornfest,Linda Lipner,Carolyn Willard,2000 In these creative and involving activities for grades K 6
 children learn the role masks and myths play in Native American and other world cultures then get a hands on introduction
 to how archaeologists and anthropologists investigate the past In addition to widening cultural understanding these activities
 enable students to refine science and math skills Reissued with new ISBN *Build It! Festival* Philip Gonsalves,Jaine
 Kopp,1999 Presents eight hands on activities for helping kindergartners through sixth graders understand math based on the
 Great Explorations in Math and Science GEMS Build It Festival outreach program **Mapping Animal Movements**
 Katharine Barrett,1999 Students observe classroom animals gaining immediate knowledge of the essential life science
 concepts of habitat and environment Using a sampling and mapping system students quantify and compare the movements of
 hamsters and crickets Activities include planning and conducting experiments such as graphing changes in movement
 patterns when food and shelter are added to the environment El-Hi Textbooks and Serials in Print ,1985 Invisible
Universe Stephen M. Pompea,Alan Gould,Lincoln Bergman,2002 The 5 class sessions of 45 60 minutes each deepen student
 understanding of the electromagnetic spectrum enabling students to detect and consider wavelengths other than visible light
 Activities feature energy stations including infrared TV remote microwave pager ultraviolet black light and other devices
 Students come up with their own tests to see what blocks each wavelength and what does not They learn how these other
 wavelengths can be used to see things we cannot see with our eyes *Ocean Currents* Catherine Halversen,Kevin
 Beals,Craig Strang,2001 What causes ocean currents How do they affect the Earth s environment How have they affected the
 course of human history Students gain fascinating insights into our world through these innovative hands on activities
 Students explore how wind temperature salinity and density set water into motion They go on to learn how the ocean makes
 our climate habitable provides oxygen and food and transports nutrients people and pollution around the globe Learning is
 put in a real world context as students study accounts of shipwrecked sailors a Nike shoe spill and the voyage of the Kon Tiki
Penguins and Their Young Jean C. Echols,2001-09 In four principal activities children learn about the penguin s body
 structure its cold home of ice and water what it eats and how emperor penguin parents care for their young **Terrarium**
Habitats Kimi Hosoume,Jacqueline Barber,2000 The guide includes concise and interesting biological information on a
 number of possible small organisms sow bugs isopods earthworms snails that can become terrarium inhabitants Students
 observe these and other terrarium components and record changes over time There are detailed instructions on setting up
 and maintaining the terrariums Special features include an optional soil profile test for older students and making
 decomposition bags to learn more about the natural life cycle **The National Standard Encyclopedia** ,1884
Treasure Boxes Jaine Kopp,Kimi Hosoume,1997 Describes a primary level program in which children cooperatively
 collect small interesting objects that they organize into boxes of treasures The children then engage in a sequence of

activities using the treasure boxes to sort classify make Venn diagrams and graph
