The Science of Wine

In this lecture you will learn about the stages of wine production, the biochemistry of wine fermentation by yeast and the different classes of compounds present in wine. Taught by Dr. André K. Isaacs, professor of chemistry at the College of the Holy Cross.

Wine has played, and continues to play a significant role in religious, cultural, and social traditions dating back to 6000 BC. Modern chemistry has allowed us to unlock the complexity of its taste, smell and look through the understanding of the different classes of compounds found in wine, the chemical processes that lead to their formation and the taste profiles they contribute to.

In this lecture, you will learn about the stages of wine production, the biochemistry of wine fermentation by yeast and the different classes of compounds present in wine. You will also learn how and when these classes of compounds are manipulated during the wine process to alter the flavor profile and sensory experience of the consumer.
