Scripture The National Gallery,2025-09-18 From the majesty of Genesis to the mystery of Revelation the Bible contains some of the world s most powerful stories and sublime wisdom It is also the inspiration for some of the greatest pictures ever painted Adam and Eve in the Garden of Eden Moses and the exodus from Egypt Samson betrayed by Delilah David slaying Goliath the beauty of Bathsheba the wisdom of Solomon these are among the dramatic scenes and memorable characters in the Old Testament portrayed here by artists such as Poussin Rembrandt and Rubens In the New Testament the figure of Jesus takes centre stage with his compelling parables and miracles depicted by artists such as Caravaggio Duccio El Greco Raphael Titian and Velazquez Together these words and paintings convey a profound sense of the sacred Both may go back many hundreds of years and yet they still have the power to move and inspire us today **Laban - Aristotle** Kiki

Seloni,2020-12-20 The focus of this book rests on an investigation into the links between Laban and Aristotle and aims at proposing a new approach to movement training for the actor In contrast to the standard Platonic reading Laban s development is best understood through the conceptual framework of Aristotle This not only provides a more secure theoretical approach but a practical one as well which establishes the art of movement as a science This investigation intends to establish Laban s philosophical foundation upon a reading of Aristotle s Poetics and in particular on the reading of the

Poetics by contemporary Greek philosopher Stelios Ramfos in his two volume book I MIMESIS VERSUS FORM Exegesis about Aristotle's Poetics 1991 1992 What is significant about Stelios Ramfos exegesis is that he attempts an analysis and interpretation of the concepts of the Poetics in terms of theatre performance it is this emphasis on performance that makes the task I have embarked upon possible The discussion will serve as a critical framework that will propose a new way of applying Laban's movement concepts to the movement training for actors in practice The research methodology is also practical I will therefore also develop and present a performance that attempts to apply Laban's terms as these are discussed in relation to Aristotle and in relation to the new methodology as well as a syllabus of practical classes addressing actor movement training in both kinaesthesia and characterization The ultimate goal of the project is to contribute an approach that can inform the way Laban's concepts are taught and provide suggestions for structuring technical movement classes for actors
