Breakthrough Whitley Strieber, 1995 After telling the world of his remarkable contacts with apparent aliens in his mega bestsellers *Communion* and *Transformation* Whitley Strieber suddenly and mysteriously retired from public life in 1989 At the time he said only that he would not return until he had something fundamentally new to say about the beings he had come to call the visitors What had

happened in 1989 was that he had gotten compelling proof that the visitors were real His first impulse was to rush this information to press but then he stopped concerned that publication might be interpreted as some kind of signal to the visitors to initiate wider contact He was worried what this might mean Not all encounter experiences were good People were afraid Strieber himself was afraid What has happened to Whitley Strieber is completely without precedent There has never been an unexplained experience so carefully documented or extensively witnessed by others He has passed four lie detector tests He has been examined for many diseases both physical and mental Not only is he entirely normal the proof he advances in this book would convince a jury

Extraterrestrial Languages Daniel Oberhaus, 2019-10-22 If we send a message into space will extraterrestrial beings receive it Will they understand The endlessly fascinating question of whether we are alone in the universe has always been accompanied by another more complicated one if there is extraterrestrial life how would we communicate with it In this book Daniel Oberhaus leads readers on a quest for extraterrestrial communication Exploring Earthlings various attempts to reach out to non Earthlings over the centuries he poses some not entirely answerable questions If we send a message into space will extraterrestrial beings receive it Will they understand What languages will they and we speak Is there not only a universal grammar as Noam Chomsky has posited but also a grammar of the universe Oberhaus describes among other things a late nineteenth century idea to communicate with Martians via Morse code and mirrors the emergence in the twentieth century of SETI the search for extraterrestrial intelligence CETI communication with extraterrestrial intelligence and finally METI messaging extraterrestrial intelligence the one way space voyage of Ella an artificial intelligence agent that can play cards tell fortunes and recite poetry and the launching of a theremin concert for aliens He considers media used in attempts at extraterrestrial communication from microwave systems to plaques on spacecrafts to formal logic and discusses attempts to formulate a language for our message including the Astraglossa and two generations of Lincos lingua cosmica The chosen medium for interstellar communication reveals much about the technological sophistication of the civilization that sends it Oberhaus observes but even more interesting is the information embedded in the message itself In

Extraterrestrial Languages he considers how philosophy linguistics mathematics science and art have informed the design or limited the effectiveness of our interstellar messaging
