Themaat,1981-08      **The UN Secretariat's Influence on the Evolution of Peacekeeping** S. Weinlich,2014-06-23 Using a unique analytical framework the UN Secretariat's Influence on the Evolution of Peacekeeping reveals deep insights in the UN's peacekeeping decision making and shows that even international bureaucracies with limited autonomy can shape international politics

**US Hegemony and International Organizations** Rosemary Foot,S. Neil MacFarlane,Michael Mastanduno,2003-02-27 The relationship between a powerful United States of America and some of the central multilateral organizations in global society is an essential feature of contemporary international relations US Hegemony and International Organizations brings together a range of leading scholars to examine this crucial phenomenon Its aims are two fold to describe and explain US behaviour in and towards a wide range of significant global and regional institutions and secondly to examine the impact of US behavior on the capacity of each organization to meet its own objectives The study explores US behavior and its consequences for organizations based at the regional as well as the global levels for those located in different regions of the world and for such issue areas as security economics and the environment Although focusing on the period since the 1990s each chapter places its findings in a broader historical context

**The Politics of Evaluation in International Organizations** Vytautas Jankauskas,Steffen Eckhard,2023-04-26 Evaluation has become a key tool in assessing the performance of international organizations in fostering learning and in demonstrating accountability Within the United Nations UN system thousands of evaluators and consultants produce hundreds of evaluation reports worth millions of dollars every year But does evaluation really deliver on its promise of objective evidence and functional use By unravelling the internal machinery of evaluation systems in international organizations this book challenges the conventional understanding of evaluation as a value free activity Vytautas Jankauskas and Steffen Eckhard show how a seemingly neutral technocratic tool can serve as an instrument for power in global governance they demonstrate and explain how deeply politics are entrenched in the interests of evaluation stakeholders in the control and design of IO evaluation systems and to a lesser extent also in the content of evaluation reports The analysis draws on 120 research interviews with evaluators member state representatives and IO secretariat officials as well as on textual analysis of over 200 evaluation reports The investigation covers 21 UN system organizations including detailed case studies of the ILO IMF UNDP UN WOMEN IOM UNHCR FAO WHO and UNESCO Shedding light on the ineffectiveness of evidence based policymaking the authors propose possible ways of better reconciling the observed evaluation politics with the need to gather reliable evidence that is used to improve the functioning of the United Nations The answer to evaluation politics is not to abandon evaluation or isolate it from the stakeholders but to acknowledge surrounding political interests and design evaluation systems accordingly

**Delegation and Agency in International Organizations** Darren G. Hawkins, David A. Lake, Daniel L. Nielson, Michael J. Tierney, 2006-09-14 Why do states delegate certain tasks and responsibilities to international organizations rather than acting unilaterally or cooperating directly Furthermore to what extent do states continue to control IOs once authority has been delegated Examining a variety of different institutions including the World Trade Organization the United Nations and the European Commission this book explores the different methods that states employ to ensure their interests are being served and identifies the problems involved with monitoring and managing IOs The contributors suggest that it is not inherently more difficult to design effective delegation mechanisms at international level than at domestic level and drawing on principal agent theory help explain the variations that exist in the extent to which states are willing to delegate to IOs They argue that IOs are neither all evil nor all virtuous but are better understood as bureaucracies that can be controlled to varying degrees by their political masters

**Development at the WTO** Sonia E. Rolland, 2012-02-23 Seeking to open paths for reconsidering the trade and development relationship at the WTO this book takes into account both the heritage of the trade regime and its present dynamics It argues that the institutional processes for creating and implementing trade rules at the WTO and the actual regulatory outcomes are inseparable A consideration of the WTO's development dimension must examine both jointly It shows that the shortcomings of the Doha Development Round are in part due to a failure to assess trade rules as part of the legal processes and institutions that produced them This book devotes significant analysis to the systemic impact of the WTO as an institution on developing and least developed members From a pragmatic perspective it provides a coherent and systematic analysis of the legal meaning the implementation and the adjudication of special and differential treatment rules for developing members It then evaluates the different regulatory approaches to trade and development from a more theoretical perspective The book finishes by presenting a range of proposals for a better balance between trade liberalization and the development needs of many WTO members
