reinterprets early architectural theory by examining the Renaissance ideal of decorum the nature of the architectural work and the ways in which architects are constituted as authors Lastly Vehicles considers building in terms of literal and metaphorical movement using two cases from the twentieth century that investigate the relationship between architecture and cultural memory Using a broadly forensic approach to connect details in otherwise disparate cases Things That Move is a breathtakingly capacious architectural account that will change the way readers understand buildings their becoming and their significance *The Architectural Review* ,1974
