The Cosmic Breath Amos Yong, 2012-05-10 Recent thinking in the interfaith dialogue and in the theology science dialogue have taken a pneumatological turn The Cosmic Breath explores this pneumatological theology as unfolded in the Christian Buddhist dialogue alongside critical interaction with the theology and science conversation As an attempt in comparative and constructive Christian philosophical theology its central thesis is that a pneumatological approach to Buddhist traditions in further dialogue with modern science generates new philosophical resources that invigorate Christian thinking about the natural world and humanity s place in it The result is a transformation of the Buddhist Christian dialogue from insights generated in the theology and science interface and a contribution to the religion and science dialogue from a comparative theological and philosophical perspective

Entertaining the Triune Mystery Jeffrey

C. Pugh, 2003-10-01 Drawing on one of Christianity's great mysteries the life of the Trinity Jeffrey Pugh seeks to bridge the gap between ancient faith traditions and scientific inquiry in part by celebrating that gap itself as God's essence Pugh uses the wisdom of Plato Irenaeus the Cappadocians Einstein and many others to prompt us to think of God's energies within the processes of creation and life as the presence of God's suffering love for the cosmos God not only nourishes the possibilities of the creation but is fully present in them both suffering with and extending hope for a world coming to be **BOOK JACKET** Title Summary field provided by Blackwell North America Inc All Rights Reserved Science of God Kevin J. Sharpe, 2006 Is theology responsible to tradition or new insight Institutional church or humanity at large Spiritual or everyday existence Revelation or scientific findings In his new book Science of God Truth in the Age of Science Kevin Sharpe proposes a method for doing theology which does not divorce it from the practical applications of science Not only does this work establish that theology ought to be empirical in what it says about the world and God's relationship to it but it also outlines a clear method for doing this Science and theology can each share the same empirical method when each attempts a description of any part of reality it is relying on its own essential assumptions or lens When applied to theology the method assumes the existence of God and then seeks the nature of God using falsifiable and verifiable techniques Starting with the sciences that examine happiness particularly biology genetics psychology and social psychology Science of God seeks to understand the spiritual nature of humans and through it the nature of God **An Amos Yong Reader** Amos Yong, 2020-05-12 Amos Yong is the most prolific pentecostal theologian to date and his published works are so many that it is difficult to find an amiable entry point into his thought An Amos Yong Reader is the first introduction to Yong's theology in his own words It brings into one volume representative samples of the broad range of Yong's scholarship including theology of religions religion and science theology and disability political theology Luke Acts and theological method Christopher A Stephenson perhaps Yong's most insightful interpreter provides an introductory essay that both orients readers to Yong's extensive theological program and identifies the most important key to understanding Yong's theology as his most neglected work Spirit Word Community a book with implications far beyond the boundaries of Pentecostalism An Amos Yong Reader provides an overview of Yong's thought and a starting point for more thorough study in any of the major themes in his expansive corpus **Race and the Cosmos** Barbara A. Holmes, 2002-06-01 Argues that theoretical physics and cosmology can provide a key to overcoming race related problems explaining how they enable a means for discussing individual and communal quests for fulfillment beyond racial ethnic class and sexual barriers Original
