Pavia, 1998 In this laboratory textbook for students of organic chemistry experiments are designed to utilize standard scale macroscale glassware and equipment but with smaller amounts of chemicals and reagents The textbook features a large number of traditional organic reactions and syntheses as well as the isolation of natural products and experiments with a biological or health sciences focus The organization of the text is based on essays and topics of current interest Contains a comprehensive treatment of laboratory techniques including both small scale and some microscale methods      Green Organic Chemistry Kenneth M. Doxsee, James E. Hutchison, 2004 This lab text describes the tools and strategies of green chemistry and the lab experiments that allow investigation of organic chemistry concepts and techniques in a greener laboratory setting Students acquire the tools to assess the health and environmental impacts of chemical processes and the strategies to improve develop new processes that are less harmful to human health and the environment The curriculum introduces a number of state of the art experiments and reduces reliance on expensive environmental controls such as fume hoods Provided by publisher
