

# THE FUTURE OF THE EUROPEAN BUILT ENVIRONMENT

What will the European built environment look like in 2050? It is shaped by the effects of climate change, resource scarcity, changes in population, urbanisation, and focus on health and wellbeing. Buildings integrate a vast amount of technology that connect buildings to information management and sharing platforms. Buildings have evolved into temporary storage of circular materials and products and have become data hubs that support optimal resource efficiency and wellbeing.

## CLIMATE RESILIENT

Buildings are entirely climate resilient, green, energy neutral buildings that are designed to withstand floods and heat stress, and that are part of climate resilient zones and urban areas.

## FLEXIBLE BUILDINGS

Buildings will facilitate flexibility. They are adapted for changes in use on the short-term, while being constructed for the long-term. Smaller and flexible units will provide living spaces for the growing urban population.

## COGNITIVE BUILDINGS

Buildings will be able to autonomously manage its internal climate (light, temperature, air) and efficiently adjust e.g. energy use by themselves. Cognitive buildings are connected to smart grids and are part of the net.

## BUILDINGS FOCUS ON PERFORMANCE

The sustainability, performance, energy performance, and other performance are central drivers for comfortable living and working, and also determine the value of a building.

## ENABLING WORKING AND LIVING IN A 24-HOUR ECONOMY

In our 24-hour global economy buildings will provide continued working and living space. Libraries, sports, shops and other amenities are combined in buildings that provide 24-hour connectivity.

## CIRCULAR BUILDINGS

Buildings are circular built with reused materials and/or recycled materials, are modular and decomposable. They have become a temporary storage of materials and products.

## ENERGY POSITIVE

Buildings create energy through photovoltaic solutions and are highly energy efficient and independent of fossil fuels. Buildings are connected to a smart grid to share and store electricity and heat.

## SUPPORT A HEALTHY LIFESTYLE

Buildings provide a healthy environment: healthy noise management, optimal temperature management, clean air and daylight. The design fully supports the wellbeing of its users.

## **Smart And Sustainable Built Environments:**

Smart and Sustainable Built Environments Jay Yang, Peter S. Brandon, Anthony C. Sidwell, 2008-04-15 This book brings together a group of international specialists to explore the current state of the art and future potential for encouraging developing and implementing smart and sustainable built environment strategies. It covers a broad spectrum of issues ranging from technological advancement through the assessment of past experiences to communication and education requirements and future strategies. It provides a snapshot of current methods and technologies for developing smart and sustainable built environment strategies over 30 fully refereed chapters from international experts. It addresses the particular requirements and problems of different areas and climatic regions. Smart and Sustainable Built Environments, 2007

Sustainable development is rapidly becoming a global phenomenon the remit of which encompasses a wide range of professions and societal interest groups. This collection of papers from the CIBT ask Group 55 smart and sustainable built environments presents key findings to date on a wide range of current research and practice in this emerging field in order to promote awareness, understanding and synergy. The first five papers in this e-book focus directly on sustainability while the final three papers identify cross-cutting themes as associated with tools, processes and culture. *Smart and Sustainable Cities and Buildings* Rob Roggema, Anouk Roggema, 2020-05-11 This book brings together the papers presented at the Smart and Sustainable Built Environments Conference 2018 SASBE. This latest research falls into two tracks: smart and sustainable design and planning cities and the technicalities of smart and sustainable buildings. The growth of smart cities is evident but not always linked to sustainability. This book gives an overview of the latest academic developments in increasing the smartness and sustainability of our cities and buildings. Aspects such as inclusivity, smart cities, place and space, the resilient city, urbanity and urban ecology are prominently featured in the design and planning part of the book while energy, educational buildings, comfort, building design, construction and performance form the sub-themes of the technical part of the book. This book will appeal to urban designers, architects, urban planners, smart city designers and sustainable building experts.

**Proceedings of the International Conference on Smart and Sustainable Built Environment (SASBE 2024)** Ali GhaffarianHoseini, Amirhosein Ghaffarianhoseini, Farzad Rahimian, Mahesh Babu Purushothaman, 2025-04-19 This book presents peer-reviewed articles from the International Conference of Sustainable Development and Smart Built Environments SDSBE2024 held from 6-8 Nov at Auckland, New Zealand. It encapsulates cutting-edge research in Sustainable Development and Smart Built Environments featuring global scholars. Encompassing diverse themes, the book explores sustainable urban development, governance and policy, emphasizing urban greening and climate resilience. It delves into innovative approaches for sustainable transport, intelligent infrastructure and community well-being. The integration of Data Science, AI and IoT for optimizing built environments is a focal point alongside advancements in digital twins and OpenBIM. Social aspects including equity and indigenous perspectives are explored along with health considerations in urban settings.

The proceedings serve as a comprehensive resource reflecting the multifaceted advancements driving sustainable and smart urban futures **Sustainable Built Environment and Urban Growth Management** Wann-Ming Wey,2020-02-21

Nowadays the sustainable built environment planning in most cities has come to a turning point as the growth in traffic and population has become a serious concern and put tremendous pressure on both the environment and people in these cities It is therefore important to find new ways or lifestyles such as compact city transit oriented development TOD formulations that are more flexible inclusive and sustainable Furthermore for the sustainable built environment and urban growth management not only should the growth management principles which include smart growth sustainable growth and inclusive growth be taken into account but innovative smart planning strategies such as mixed use design green transport and new urbanism are also utilized in planning sustainable built environments in order to prevent the urban sprawl development that has occurred **Sustainable Built Environment for People and Society** ,2025-07-30

The pursuit of sustainable built environments has become a strategic global priority in addressing the complex interplay of social economic environmental and human development challenges outlined in the United Nations Sustainable Development Goals SDGs Accelerating urbanization climate risks and widening inequality are placing unprecedented strain on cities and communities demanding a fundamental shift in how we design deliver and manage the built environment Sustainable built environments are central to achieving key Sustainable Development Goals SDGs particularly SDG 11 Sustainable Cities and Communities SDG 3 Good Health and Wellbeing SDG 7 Affordable and Clean Energy and SDG 13 Climate Action Built infrastructure must minimize environmental impact maximize energy efficiency and enhance the quality of life while placing people at the center ensuring inclusivity resilience and adaptability to future needs A leading example of this approach is the Zero Energy Mass Custom Home ZEMCH initiative ZEMCH promotes the delivery of affordable high performance housing that meets both individual and community needs By combining mass customization with energy efficient design and renewable energy technologies ZEMCH homes aim to achieve net zero energy consumption reduce their carbon footprint and enhance occupant wellbeing Equity and accessibility must also be embedded in the built environment ensuring that all individuals regardless of income age or ability can access safe functional and dignified spaces Ultimately sustainable development is not only about constructing greener buildings but also about shaping environments that foster social cohesion environmental stewardship and long term wellbeing Achieving this requires cross sector collaboration meaningful community engagement and the integration of sustainability principles throughout the entire lifecycle of the built environment transforming it into a catalyst for positive change for both people and society **Sustainable Futures in the Built Environment to 2050** Tim Dixon,John Connaughton,Stuart Green,2018-01-09 Brings together leading thinking on issues of new professional practice and on the future of a sustainable built environment This book focuses on both construction and development issues and examines how we can transition to a sustainable future by the year 2050 bringing together leading research and practice at

building neighbourhood and city levels It deftly analyses how emerging socio economic technological and environmental trends will influence the built environment of the future The book covers a broad spectrum of interests across the scales of buildings communities and cities including how professional practice will need to adapt to these trends The broader context is provided by an analysis of emergent business models and the changing requirements for expert advice from clients

*Sustainable Built Environments* Vivian Loftness,2020-09-23 This volume in the Encyclopedia of Sustainability Science and Technology Second Edition describes the breadth of science and engineering knowledge critical to advancing sustainable built environments from architecture and design mechanical engineering lighting and materials to water and energy public policy and economics Covering both building landscape and green infrastructure design and management detailed consideration is given to how the building sector the biggest player in the energy use equation can minimize energy demand while providing measurable gains for productivity health and the environment With a focus on the environmental context the reader will understand how sustainable design merges the natural minimum resource conditioning solutions of the past daylight solar heat and natural ventilation with the innovative technologies including nature based solutions of the present The desired result is an integrated intelligent and as socially just as possible system that supports individual control with expert negotiation for resource consciousness

*The Elgar Companion to the Built Environment and the Sustainable Development Goals* Alex Opoku,2024-02-12 Exploring the link between Sustainable Development Goals SDGs and the built environment this erudite Companion provides a comprehensive overview and critical examination of key topics and complex research issues Structured around the 5Ps of the SDGs people planet prosperity peace and partnerships the Companion suggests potential routes for the future direction of research within this multidisciplinary field of study

*Cognitive Digital Twins for Smart Lifecycle Management of Built Environment and Infrastructure* Ibrahim Yitmen,2023-07-17 This book provides knowledge into Cognitive Digital Twins for smart lifecycle management of built environment and infrastructure focusing on challenges

and opportunities It focuses on the challenges and opportunities of data driven cognitive systems by integrating the heterogeneous data from multiple resources that can easily be used in a machine learning model and adjust the algorithms It comprises Digital Twins incorporating cognitive features that will enable sensing complex and unpredicted behavior and reason about dynamic strategies for process optimization to support decision making in lifecycle management of the built environment and infrastructure The book introduces the Knowledge Graph KG centric framework for Cognitive Digital Twins involving process modeling and simulation ontology based Knowledge Graph analytics for process optimizations and interfaces for data operability It offers contributions of Cognitive Digital Twins for the integration of IoT Big data AI smart sensors machine learning and communication technologies all connected to a novel paradigm of self learning hybrid models with proactive cognitive capabilities The book presents the topologies of models described for autonomous real time interpretation and decision making support of complex system development based on Cognitive Digital Twins with applications in critical domains such as maintenance of complex engineering assets in built environment and infrastructure It offers the essential material to enlighten pertinent research communities of the state of the art research and the latest development in the area of Cognitive Digital Twins as well as a valuable reference for planners designers developers and ICT experts who are working towards the development and implementation of autonomous Cognitive IoT based on big data analytics and context aware computing

*Smart Technologies and Design For Healthy Built Environments* Ming Hu, 2020-09-10 Smart Technologies and Design for Healthy Built Environment connects smart technology to a healthy built environment that builds upon the sustainable building movement It provides an overall summary of the state of the art technologies that are applied in the built environment The book covers a broad spectrum of smart technology categories ranging from dynamic operability energy efficiency self regulating and self learning systems and responsive systems The foreseeable challenges that are associated with smart technologies are discussed and outlined in the book Firstly this book provides a snapshot of state of the art smart technologies being applied in the built environment It covers a broad spectrum of smart technology categories ranging from dynamic operability energy efficiency self regulating and self learning systems to responsive systems Secondly this book provides in depth analysis of the four primary components of health biological physical physiological and psychological their effects on wellbeing and cognitive performance are introduced as well Thirdly it connects smart technologies to those health influencing factors by reviewing three completed smart building projects This book can also serve as a basis for education and discussion among professionals and students of diverse backgrounds who are interested in smart technologies smart building and healthy building Smart Technologies and Design for Healthy Built Environment serves as the basis for education and discussions among professionals and students who are interested in smart technologies smart building and healthy building as it bridges the gap between smart technologies and a healthy built environment The book also provides a foundation for anyone who is interested in the impact of smart technology on the

health of built environment      Integrated Building Intelligence Hamidreza Alavi, Soheila Kookalani, Farzad Rahimian, Núria Forcada, 2024-09-01 This book integrates of Building Information Modeling BIM and Decision Support Systems DSS in the field of building design construction and maintenance The book explores how BIM and DSS technologies can be synergistically utilized to enhance performance comfort and maintenance efficiency in buildings With an emphasis on practical applications the book provides a comprehensive overview of the latest advancements in BIM and DSS including real world case studies and implementation guidelines The book features illustrations tables and examples that aid in understanding complex concepts and demonstrate the practical application of BIM and DSS in building projects Readers will gain a deep understanding of how BIM and DSS can be integrated to optimize building design streamline construction processes and improve facility management and maintenance The main benefit of reading this book is that it provides a valuable resource for professionals in the architecture engineering and construction industries who want to leverage the power of BIM and DSS to enhance their building projects Additionally the book explores how BIM and DSS can contribute to energy efficiency

**BIM-enabled Cognitive Computing for Smart Built Environment** Ibrahim Yitmen, 2021-06-17 The book provides knowledge in the Building Information Model BIM enabled cognitive computing methods for smart built environment involving cognitive network capabilities for smart buildings integrating Augmented Reality Mixed Reality in cognitive building concepts cognitive Internet of Things CIoT for smart cities Artificial Intelligence applications for cognitive cities and cognitive smart cities using big data and machine learning It focuses on the potential requirements and implementation of CIoT paradigm to buildings Artificial Intelligence techniques reasoning and Augmented Reality Mixed Reality in cognitive building concepts the concept of cognitive smart cities in its complexity heterogeneity and scope and the challenge of utilizing the big data generated by smart cities from a machine learning perspective The book comprises BIM based and data analytic research on cognitive IoT for smart buildings and cognitive cities using big data and machine learning as complex and dynamic systems It presents applied theoretical contributions fostering a better understanding of such systems and the synergistic relationships between the motivating physical and informational settings It reviews ongoing development of BIM based and data science technologies for the processing analysis management modeling and simulation of big and context data and the associated applicability to cognitive systems that will advance different aspects of future cognitive cities The book also analyses the required material to inform pertinent research communities of the state of the art research and the latest development in the area of cognitive smart cities development as well as a valuable reference for planners designers strategists and ICT experts who are working towards the development and implementation of CIoT based on big data analytics and context aware computing

*Proceedings of the 15th International Conference on Sustainable Built Environment* Ranjith Dissanayake, Priyan Mendis, Sudhira De Silva, Shiromal Fernando, Upul Attanayake, Pradeep Gajanayake, 2025-07-29. This book highlights the latest knowledge and innovations in the fields of civil engineering and construction industry striving for a sustainable built environment. This book consists of high quality innovative research findings selected from the proceedings of the 15th International Conference on Sustainable Built Environment ICSBE 2024 under the themes of sustainable construction, urban green infrastructure and planning, rainwater harvesting and water conservation, high performance concrete, indoor environmental quality and indoor plants, wind and hydro power, energy waste and wastewater management for enhanced sustainability, impacts of climate change, carbon footprint, global climate model and landscaping, material flows and industrial ecology, sustainable materials etc. Routledge Handbook of Smart Built Environment Weisheng Lu, Chimay J. Anumba, 2025-03-20. The primary aim of this edited volume is to document the current theories, best practices, and technological advancements in the move towards a Smart Built Environment (SBE). The needs to accelerate towards the SBE are numerous and include increasing complexities and the need for interconnectivity within the built environment e.g. mega infrastructure projects, data-driven decision making resulting in higher demand from clients e.g. smart design, construction operation and end of life (EOL). High requirements from stakeholders e.g. system efficiency, environmental performance, green procurement, fast-paced technological advancement and integration, natural disaster resilience of the built environment e.g. prediction, smart control of building component. Sustainability issues around the built environment. In this book, the interrelationships among the various lifecycle stages: design, construction, operation, and EOL, the collective benefit of synergy at building level, multi infrastructure level, and city level, as well as the ultimate goals in relation to the deployment of smart technologies in the industry are addressed. Part I covers smart design and construction; Part II smart living and operation; and Part III broadens the scope to the whole smart city. Chapters examine how smart technologies can improve the effectiveness, productivity, and efficiency of the built environment. An overview of theories and practices that are enabled by innovations and technologies for developing the SBE. The basis for new research agenda, new concepts, and frameworks for future development. This handbook documents the

current theories practices and technologies and develops a holistic approach for research and practice by adopting a multidimensional outlook for the SBE It is an essential reference work for all built environment stakeholders from academia through to the professions      **Sustainable Built Environment** Deepak Bajaj,Thayaparan Gajendran,Sanjay Patil,2024-02-22 This book presents the select proceedings of International Conference on Sustainable Built Environment ICSBE 2023 It discusses the issues of sustainability and resilience in all types of building projects construction projects operational building and infrastructure projects within urban regions of the world The key themes covered in this book are sustainable urban planning sustainable construction real estate housing net zero built environment climate change policy legal framework climate finance technology and innovation toward decarbonization of the built environment This book is useful for researchers and professionals working in the fields of construction management built environment and allied fields

### **Smart And Sustainable Built Environments Introduction**

Smart And Sustainable Built Environments Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Smart And Sustainable Built Environments Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Smart And Sustainable Built Environments : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Smart And Sustainable Built Environments : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Smart And Sustainable Built Environments Offers a diverse range of free eBooks across various genres. Smart And Sustainable Built Environments Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Smart And Sustainable Built Environments Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Smart And Sustainable Built Environments, especially related to Smart And Sustainable Built Environments, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Smart And Sustainable Built Environments, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Smart And Sustainable Built Environments books or magazines might include. Look for these in online stores or libraries. Remember that while Smart And Sustainable Built Environments, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Smart And Sustainable Built Environments eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Smart And Sustainable Built Environments full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range

of Smart And Sustainable Built Environments eBooks, including some popular titles.

## FAQs About Smart And Sustainable Built Environments Books

**What is a Smart And Sustainable Built Environments PDF?** A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Smart And Sustainable Built Environments PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Smart And Sustainable Built Environments PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Smart And Sustainable Built Environments PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Smart And Sustainable Built Environments PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
