Science, Women and Revolution in Russia Ann Hibner Koblitz, 2014-01-02 While the women s movement might seem like a relatively new concept Russian women of the 1860s deserve to be acknowledged as individuals who changed the direction of science and opened the doors of higher education to women throughout Europe The 1860 s and 1870 s witnessed a rise in women s consciousness and the beginnings of the Russian revolutionary movement that saw women pursue and receive doctorates in many areas of science These same women went on to become some of the brightest in their fields This book provides a look at Russian women scientists of the 1860 s their personal independence and technical and literary achievements that made science the popular social movement of the time and changed the face of the Russian intellectual culture

Inventing the Industrial Revolution Christine MacLeod, 2002-05-09 This book examines the development of the English patent system and its relationship with technical change during the period between 1660 and 1800 when the patent system evolved from an instrument of royal patronage into one of commercial competition among the inventors and manufacturers of the Industrial Revolution It analyses the legal and political framework within which patenting took place and gives an account of the motivations and fortunes of patentees who obtained patents for a variety of purposes beyond the simple protection of an invention It includes the first in depth attempt to gauge the reliability of the patent statistics as a measure of inventive activity and technical change in the early part of the Industrial Revolution and suggests that the distribution of patents is a better guide to the advance of capitalism than to the centres of inventive activity It also queries the common assumption that the chief goal of inventors was to save labour and examines contemporary criticism of the patent system in the light of the changing conceptualisation of invention among natural scientists and political economists
