**Issues in Mathematics Teaching** Peter Gates,2002-09-11 This book presents the key debates that the mathematics teacher will need to understand reflect on and engage in as part of their professional development Issues in Mathematics Teaching is suitable for those at initial training level right through to practising mathematics teachers Its accessible structure enables the reader to pursue the issues raised as each chapter includes suggestions for further reading and questions for reflection or debate      *The Sociology of Mathematics Education* Paul Dowling,2002-11-01 Until the 1960s maths was studied as an academic subject in a desire to have more mathematicians The current trend however has moved away from viewing maths as a purely intellectual endeavour and towards developing a more mathematically competent workforce and citizenry This trend has seen a large increase in the number of maths schemes being produced by the major educational publishers which attempt to make maths easier and more approachable by using language instead of symbols So why do so many children still fail at maths The author contends that to understand this teachers need to analyze and evaluate the maths textbooks they are currently using The author shows the reader how to systematically analyze and evaluate these textbooks This interrogation of classroom resources should have important implications for teaching strategies and for textbook design and use      Country Guide and Nor'west Farmer ,1927      **Reading Bernstein, Researching Bernstein** Brian Davies,Ana Morais,Johan Muller,2004-06-24 Basil Bernstein is arguably one of the most important educational theorists of the late 20th century This book written by a team of international contributors offers an insight into the richness and depth of his theories      *Algebra in the Early Grades* James J.
