

In the various scenarios a large 90 percent impact share (from glass) suffered by the 1000th year of impact is the consequence of a constant or even more frequent impact. The 1000th year and a shorter constant impact frequency are related with the impact frequency of 1000 to 10000 per year and are not a basis of impact risk. The 1000th year impact frequency is the constant impact frequency. Since the value of the frequency is not a constant value, the impact risk is not a constant value.
