Medicine, 2013-03-22 ACSM's Resources for the Personal Trainer provides a broad introduction to the field of personal training covering both basic science topics and practical application. It was originally designed to help people prepare for the ACSM Personal Training Certification Exam. It continues to serve that function but the market for it has expanded to practitioners in the field looking for an additional resource as well as in an academic setting where the book is a core text for personal training programs Confessions of a Certified Personal Trainer Robert Linkul MS CSCS, 2011-06-27 Robert's

commitment to the personal training business earned him the honor of serving the National Strength and Conditioning Association as their Northern California State Director 2010-2012. Robert has his master's degree in personal training, his bachelor's degree in kinesiology, is a certified strength and conditioning specialist with distinction, a certified NSCA certified personal trainer with distinction as well as a certified USA Weightlifting Level I coach. I have grown tired of all the fads and myths of the certified personal training business and decided I would put out an email to all my clients discussing a topic like site specific reduction or crash diets. The support I received after sending out the first newsletter inspired me to keep writing. My goal is to change the way people think of fitness. I call it the fitness revolution. This book is a combination of education, experience and research all put together and thrown down on paper. These are my confessions as a certified personal trainer. Many trainers will not tell you information like you will read in this book. That is why I call it a revolution. We are breaking away from the norm and developing something new. With science and research as my guide, I will educate you on a new way to train the right way to training **Personal Trainer's Guide to Program Design** IDEA Health & Fitness, 2002
