Sweetpotato in South Asia: Postharvest handling, processing, storage and use (Proceedings). , Sweet Potato Products John C. Bouwkamp,2018-01-18 It has been the goal in this

volume to summarize the current level of understanding in a number of areas relating to sweet potato production and utilization To accomplish this a group of authors each with broad experience in the selected areas was assembled It is hoped that this volume will be useful as a beginning point a foundation for further research efforts

Tropical Root and Tuber

Crops, 2nd Edition Vincent Lebot, 2019-12-02 Root and tuber crops are important to agriculture food security and income for 2.2 billion people in developing countries. These species produce large quantities of dietary energy and have stable yields under difficult environmental conditions. This second edition of *Tropical Root and Tuber Crops* is an authoritative treatment of four important root and tuber crops: cassava, sweet potato, yams, and aroids. **Adding Value to Root and Tuber Crops: A Manual on Product Development** Christopher Wheatley, 1995 Sweet Potato Jennifer A. Woolfe, 1992-03-05 The sweet potato is at present grown in more than 100 of the independent countries of the world. Most of the producer nations are situated in the tropical developing world where a high proportion of the poorest people live. Increasing recognition of the potential which sweet potato holds for combating food shortages and malnutrition has resulted in intensified research efforts to enhance production and consumption. This book reviews our knowledge about the varied aspects of the sweet potato as a human food and animal feedstuff. This volume will be found practical and informative by all those involved in food and nutrition sciences especially but not exclusively in developing countries. These include research workers in food or agriculture, dieticians, nutritionists, food technologists, students, planners and policy makers. **New Crops for Food and Industry** G.E. Wickens, N. Haq, P. Day, 1989-06-30 Examining the development of alternative crops, this volume covers topics which include genetic engineering and tissue culture techniques and marketing potential utility of new crops. *Cassava in Asia, Its Potential and Research Development Needs*, 1986 **Desarrollo de productos de raíces y tubérculos** Gregory J. Scott, 1992 **Fruit and Vegetables** Anthony Keith Thompson, 2014-10-03 Completely revised, updated and enlarged, now encompassing two volumes, this third edition of *Fruit and Vegetables* reviews and evaluates in comprehensive detail postharvest aspects of a very wide international range of fresh fruit and vegetables as it applies to their physiology, quality, technology, harvest, maturity, determination, harvesting methods, packaging, postharvest treatments, controlled atmosphere, storage, ripening and transportation. The new edition of this definitive work, which contains many full colour photographs and details of species not covered in the previous editions, provides key practical and commercially oriented information of great use in helping to ensure that fresh fruit and vegetables reach the retailer in optimum condition with the minimum of deterioration and spoilage. With the constantly increasing experimental work throughout the world, the book incorporates salient advances in the context of current work as well as that dating back over a century to give options to the reader to choose what is most relevant to their situation and needs. This is important because recommendations in the literature are often conflicting; part of the evaluation of the published results and reviews is to guide the reader to make suitable choices through discussion of the reasons for diverse recommendations. Also included is much more on the nutritional values of fruit and vegetables and how these may vary and change postharvest. There is also additional information on the origin, domestication and taxonomy of fruit and vegetables, putting recommendations in context. *Fruits and Vegetables 3e* is essential reading for fruit and vegetable technologists, food scientists and food technologists, agricultural scientists, commercial
