Skill Training For Community Living Applying Structured Learning Therapy:

Skill Training for Community Living Arnold P. Goldstein, Robert P. Sprafkin, N. Jane Gershaw, 1976 Teaching Psychological Skills Dale Larson, 1984 **Psychological Treatment of Older Adults** Michel Hersen, Vincent B. Van Hasselt, 2013-06-29 This multiauthored introductory textbook could not have been conceived or brought to fruition 10 or 15 years ago. Indeed, at that time, relatively little attention was accorded to the psychological needs of older adults. The general tenor of the field then was that older adults would not benefit from psychological intervention. As we now know, this was a faulty assumption that has been discredited with empirical data. Indeed, clinical research data adduced primarily in the last decade clearly documents that older adults do benefit from specific psychotherapies that are tailored to their unique presentation of symptoms. Given the explosion of interest in this area, as evinced by increased investigatory activity, national funding, and media attention, and the increased number of masters and doctoral level courses devoted to this topic, we felt that the time was right for a textbook in the area. Such flurry of activity also has been fueled by statistics showing how our population by the year 2030 will consist of 30% who are senior citizens. Moreover, since 12% of older adults in the community are estimated to have diagnosable psychiatric disorders and 40% to 50% of older adult medical inpatients have a concomitant psychiatric disorder, the task for clinicians in the next century will be overwhelming.

The Practice of Psychotherapy (Psychology Revivals) Lewis R. Wolberg, 2014-08-01 Freud once humorously remarked that "Anyone who wants to make a living from the treatment of nervous patients must clearly be able to do something to help them." It is amazing how frequently this simple precept is ignored, and when a patient does not get well, how often the failure is attributed to lack of proper motivation, diminutive ego strength, latent schizophrenia, and a multitude of assorted resistances. Difficulties that arise during therapy are not due to a deliberate conspiracy of neglect on the part of the therapist. They usually come about because of obstructive situations that develop in work with patients with which the therapist is unprepared to cope. During his psychiatric career, the author, who spent time both teaching and supervising, collected and collated questions from students and graduate therapists who had raised concerns about psychotherapy that related to such obstructive situations. Originally published in 1982, this volume contains both those questions and his answers.

Behaviour Therapy Nursing Philip J. Barker, 2025-09-17 The behavioural approach in nursing practice is the main concern of this book originally published in 1982 Although the discussion concentrates on the fields of psychiatry and learning disabilities it is also relevant to other areas of nursing such as the care of the elderly or of sick children The book traces the development of behaviour therapy from its beginnings in the experimental laboratory work of Pavlov Skinner and Watson to the more recent influences of social learning theory A survey is made of the major stages in the therapy process and this is followed by a detailed description of possible types of treatment In conclusion some of the more controversial issues raised in this book are reconsidered along with their implications

Overcoming Deficits of Aging Roger L. Patterson, Larry W. Dupree, David A. Eberly, Gary M. Jackson, Michael J. O'Sullivan, Louis A. Penner, Carla Dee Kelly, 2013-03-13 That older patients can be successfully treated has only recently been recognized by professionals and by older persons themselves That older persons can also be taught new skills or retaught previously existing skills constitutes even newer knowledge By focusing on the reversibility of behavioral deficits in the elderly the authors under the leadership of Dr Roger Patterson have made both a scientific and a humanitarian contribution to the well being of older persons In this volume they have presented a theoretical basis and a practical how to method of overcoming behavioral deficits They have demonstrated that their modular technique of fostering improved functioning in such areas as activities of daily living and social skills not only has been successful but also has allowed individuals to return to less restrictive environments or to completely independent living The approach is an interdisciplinary one appropriately since older people often experience difficulties in multiple areas of functioning The authors have tried to integrate social medical and behavioral approaches with an emphasis on behavioral methodologies Although this book deals primarily with behavioral approaches to treatment of the elderly in a single setting the volume clearly constitutes a challenge to other scientists and clinicians to apply the techniques described here in other settings A medical colleague of mine a geriatrician recently expressed the opinion that he had never encountered an older patient for whom he could not do something to improve health
