Environmental Politics and Liberation in Contemporary Africa M.A. Salih, 2013-03-14 Nowadays the environment looms large in the analysis of conflict in developing societies and the precise role it plays is the subject of an ongoing debate The debate has moved on from the earlier but still popular notions of power struggles class struggles and ethnic conflicts to a perception of conflict as the product of intense group competition for resources Where the state controls the distribution of resources itself inevitably becomes party to conflicts whose bone of contention is access to state power as the most efficient means of gaining access to resources The resources in question are social health education transportation communication recreation etc and material land water housing jobs contracts licenses permits etc In parts of the world and especially in Africa diminishing resources and authoritarian state rule exacerbate group competition leading to political confrontation This is the line I have followed in analysing conflict in the Horn of Africa Markakis 1987 1998 Mohamed Salih's first contribution in this volume is to move the debate a step beyond this line which can be criticized as unduly materialist He does it by bringing culture into the realm of resources not only as a resource in itself but also as the agency that assigns natural resources their value Culture thus becomes a contextual element in conflict over resources whose value is culturally determined

Skin Cancer and UV Radiation Peter Altmeyer, Klaus Hoffmann, Markus Stücker, 2012-12-06 UV radiation is recognized as the major risk factor for skin cancer For the last three decades the incidence and mortality of skin cancer have been increasing steadily in almost all parts of the world Unfortunately there have been very few advances in the management and treatment of skin cancer In comparison to other malignant tumors skin cancer offers the unique opportunity to identify this tumor at an early stage Thus there is strong interest in preventing death by early diagnosis and prompt treatment The proceedings of the International Congress on Skin Cancer and UV Radiation which was held in Bochum Germany in October 1996 reflect the newest scientific standards in the field of skin cancer The conference in Bochum was a platform for leading scientists from all over the world to discuss the complexity and diversity of UV radiation in its interaction with the skin Starting with basic science like physiology immunology and molecular biochemistry of the skin as influenced by UV radiation the book presents a profound survey into the field of skin cancer by focusing on the latest scientific results in prevention early detection treatment and epidemiology The congress in Bochum in 1996 was organized to provide a starting point for coordinated European strategies against skin cancer with internationally renowned scientists

Skin Cancers Caterina La Porta, 2011-11-14 Skin cancers are the fastest growing type of cancer in the United States and represent the most commonly diagnosed malignancy surpassing lung breast colorectal and prostate cancer In Europe the British Isles have been the highest rates of skin cancer in children and adolescents The overall idea of this book is to provide the reader with up to date information on the possible tools to use for

prevention diagnosis and treatment of skin cancer Three main issues are discussed risk factors new diagnostic tools for prevention and strategies for prevention and treatment of skin cancer using natural compounds or nano particle drug delivery and photodynamic therapy Bioengineering of the Skin Enzo Berardesca,Peter Elsner,Howard I.

Penning,2011-03-03 This volume will provide a contemporary account of advances in chemical carcinogenesis It will promote the view that it is chemical alteration of the DNA that is a route cause of many cancers The multi stage model of chemical carcinogenesis exposure to major classes of human carcinogens and their mode of action will be a focal point The balance between metabolic activation to form biological reactive intermediates and their detoxification ensuing DNA lesions and their repair will be profiled It will describe the chemical changes that occur in DNA that result from endogenous insults including epigenetic changes that lead to gene silencing It will describe major mechanisms of mutagenesis affects on tumor suppressor genes and proto oncogenes and how cell cycle check points can be by passed by the stealth like properties of chemical carcinogens Environmental agents that can promote tumor formation will be discussed The monograph will have wide appeal as a knowledge base for graduate students post doctoral fellows and faculty interested in this aspect of cancer causation and research

Haschek and Rousseaux's Handbook of Toxicologic Pathology Wanda M. Haschek,Colin G. Rousseaux,Matthew A. Wallig,Brad Bolon,Ricardo Ochoa,2001-10-16 A comprehensive understanding of toxicologic pathology is essential for those in industry academia and government who make decisions concerning the safety and efficacy of drugs and chemicals Toxicologic pathology relies heavily on the fields of both toxicology and pathology which are well covered individually in various texts and references however there are few texts that address the field of toxicologic pathology The Handbook of Toxicologic Pathology fills this void and is thus essential for all health professionals within or

interacting with the field of toxicologic pathology This two volume set provides the reader with a single reference for toxicologic pathology In volume I the book covers toxicologic pathology in its basic aspects including its definition the basic biochemical and morphologic mechanisms underlying the discipline the basic practice of toxicologic pathology including special techniques and issues essential to the understanding of toxicologic pathology such as risk assessment experimental design and statistical analysis Next the book moves to specific issues affecting the practice toxicologic pathology including issues such as knowledge management regulatory affairs and writing pathology reports Finally Volume I closes with several chapters that deal with specific classes of environmental toxicants such as endocrine disruptors and heavy metals Volume II addresses the toxicologic pathology in a thoroughly standardized systems manner addressing the basic structure and function of a particular organ system its response to toxic injury mechanisms of injury and methods of evaluation of such injury Key Features Easy to find up to date reference information Graphic and photographic plates Current hot topics and anticipated changes in toxicologic pathology Standardized chapter format Topics that are addressed in both a broad and deep manner resulting in a stand alone text Added coverage of important environmental toxicants Chapters authored by internationally recognized experts and peer reviewed *Journal of the National Cancer Institute* ,1999 **Biophysical and Physiological Effects of Solar Radiation on Human Skin** Paolo U. Cancer and Nutrition J. Mason,G. Nitenberg,2000-07 Estimates suggest that approximately 35% of cancers are a consequence of suboptimal diet In this publication epidemiologists basic scientists and clinicians review both the epidemiology and mechanistic aspects of nutrition in the prevention of lung breast colorectal and prostate cancer Moreover an update on the status of the European EPIC study is given Protein calorie malnutrition of a clinically significant degree is common among cancer patients and contributes significantly to both morbidity and mortality Besides causing death solely from progressive cachexia malnutrition leads to diminished cardiac performance an increased susceptibility to infection and a diminished response to chemotherapy Reversing or even attenuating this cachexia is an extremely problematic issue Topics covered here include mechanisms by which malnutrition evolves in cancer patients animal models of cancer wasting controversial nutritional interventions in cancer patients and nutritional support in pediatric patients and bone marrow transplantation It has become clear that nutritional oncology must be regarded as a part of oncology and that it should be integrated with genetics and molecular biology in the care of the cancer patient This book will appeal to a wide spectrum of professionals concerned with the prevention and treatment of cancer especially clinical and basic researchers and clinicians
