Murphy estate, Lisa Reilly, 2017-07-06 Of all building types the skyscraper strikes observers as the most modern in terms not only of height but also of boldness scale ingenuity and daring As a phenomenon born in late nineteenth century America it quickly became emblematic of New York Chicago and other major cities Previous studies of these structures have tended to foreground examples of more evincing modernist approaches while those with styles reminiscent of the great Gothic cathedrals of Europe were initially disparaged as being antimodernist or were simply unacknowledged *Skyscraper Gothic* brings together a group of renowned scholars to address the medievalist skyscraper from flying buttresses to dizzying spires from the Chicago Tribune Tower to the Woolworth Building in Manhattan Drawing on archival evidence and period texts to uncover the ways in which patrons and architects came to understand the Gothic as a historic style the authors explore what the appearance of Gothic forms on radically new buildings meant urbanistically architecturally and socially not only for those who were involved in the actual conceptualization and execution of the projects but also for the critics and the general public who saw the buildings take shape Contributors Lisa Reilly on the Gothic skyscraper Kevin Murphy on the Trinity and U S Realty Buildings Gail Fenske on the Woolworth Building Joanna Merwood Salisbury on the Chicago School Katherine M Solomonson on the Tribune Tower Carrie Albee on Atlanta City Hall Anke Koeth on the Cathedral of Learning Christine G O Malley on the American Radiator Building *Skyscraper* Roger Shepherd, 2003 This consideration of the skyscraper explores the meanings dimensions and resonances of these notable structures literally the highest achievements of our civilization Featuring both historical and current commentary *Skyscraper* offers a unique opportunity to see the tall building through the eyes of critics contemporary to their creation as well as to evaluate its impact influence and development during the century plus of its existence Book

Jacket **Chicago's Greatest Year, 1893** Joseph Gustaitis, 2013-05-01 In 1893 the 27.5 million visitors to the Chicago World's Fair feasted their eyes on the impressive architecture of the White City lit at night by thousands of electric lights. In addition to marveling at the revolutionary exhibits, most visitors discovered something else: beyond the fair's 633 acres lay a modern metropolis that rivaled the world's greatest cities. The Columbian Exposition marked Chicago's arrival on the world stage, but even without the splendor of the fair, 1893 would still have been Chicago's greatest year. An almost endless list of achievements took place in Chicago in 1893: Chicago's most important skyscraper was completed in 1893, and Frank Lloyd Wright opened his office in the same year. African American physician and Chicagoan Daniel Hale Williams performed one of the first known open heart surgeries in 1893. Sears and Roebuck was incorporated, and William Wrigley invented Juicy Fruit gum that year. The Field Museum, the Art Institute of Chicago, and the Museum of Science and Industry all started in 1893. The Cubs' new ballpark opened in this year, and an Austro-Hungarian immigrant began selling hot dogs outside the World's Fair grounds. His wares became the famous Chicago hot dog. Cities are not buildings; cities are people, writes author Joseph Gustaitis. Throughout the book, he brings forgotten pioneers back to the forefront of Chicago's history, connecting these important people of 1893 with their effects on the city and its institutions today. The facts in this history of a year range from funny to astounding, showcasing innovators, civic leaders, VIPs, and power brokers who made 1893 Chicago about so much more than the fair.

**The extended self** Chris Abel, 2016-10-28 In this wide-ranging study of architecture and cultural evolution, the author argues that underlying the global environmental crisis is a general resistance to changing personal and social identities shaped by a technology-based culture and its energy-hungry products. The book traces the roots of that culture to the coevolution of Homo sapiens and technology from the first use of tools as artificial extensions of the human body to the motorised cities spreading around the world whose uncontrolled effects are changing the planet itself. Advancing a new concept of the meme called the technical meme as the primary agent of cognitive extension and technical embodiment, the author proposes a theory of the extended self encompassing material and spatial as well as psychological and social elements. Drawing upon research from philosophy, psychology, and the neurosciences, the book presents a new approach to environmental and cultural studies that will appeal to a broad readership searching for insights into the crisis.
