Small Islands Marine Science Sustainab:

Small Islands George A. Maul, 1996-01-09 Published by the American Geophysical Union as part of the Coastal and Estuarine Studies Volume 51 Small tropical and subtropical islands are particularly attuned to the effects of the surrounding ocean and atmosphere Frequently these islands are densely populated and rely on the sea for sustenance and economic viability Oftentimes too individual island nations do not have the resources to address issues in oceanography and marine meteorology that are central to their future well being United Nations agencies government and non government organizations and universities are dimly aware of their role to enhance collaboration between natural scientists and resource managers particularly for Small Island Developing States SIDS Accordingly a meeting entitled Small Island Oceanography in Relation to Sustainable Economic Development and Related Coastal Area Management was held in Martinique French Antilles November 8 10 1993

Adewumi, Andrei Polejack, Joanna Vince, Maree E. Fudge, 2023-12-05 In the last decade the concept of a Blue Economy has ignited a deep theoretical debate Ranging from the integration of the triple bottom line of sustainability to the optimization of profit from ocean exploitation the meaning of the term blue economy differs considerably between epistemic communities and even more so among national and regional policies There is a general sense of the opportunity to realise enhanced social and economic benefits from the sustainable utilisation of their ocean and coastal resources under the umbrella framework of blue economy Blue economy is gaining traction already as a significant component of national policies even in spite of a clear conceptualization of the term Many countries are now preparing national policies towards realising their blue economy ambitions utilizing the concept as they see fit Likewise multilateral and regional organisations are developing guidelines and providing investment in new research technologies and financing tools that promote blue economy Critical challenges abound in particular in less privileged countries These include the gap in research capabilities governments prioritizing social wellbeing and economic profit in contrast to environmental protection the identification of new and emerging areas of ocean economic activity that are both socially and ecologically sustainable and holds viable business models that can attract private investment

In 1999 the National Academies of Sciences Engineering and Medicine released a landmark report *Our Common Journey A Transition toward Sustainability* which attempted to reinvigorate the essential strategic connections between scientific research technological development and societies efforts to achieve environmentally sustainable improvements in human well being 1 The report emphasized the need for place based and systems approaches to sustainability proposed a research strategy for using scientific and technical knowledge to better inform the field and highlighted a number of priorities for actions that could contribute to a sustainable future The past 15 years have brought significant advances in observational and predictive capabilities for a range of natural and social systems as well as development of other tools and approaches useful for sustainability planning In addition other frameworks for environmental decision making such as those that focus on climate adaptation or resilience have become increasingly prominent A careful consideration of how these other approaches might intersect with sustainability is warranted particularly in that they may affect similar resources or rely on similar underlying scientific data and models To further the discussion on these outstanding issues the National Academies of Sciences Engineering and Medicine convened a workshop on January 14 15 2016 Participants discussed progress in sustainability science during the last 15 years potential opportunities for advancing the research and use of scientific knowledge to support a transition toward sustainability and challenges specifically related to establishing indicators and observations to support sustainability research and practice This report summarizes the presentations and discussions from the workshop

Marine Bioprospecting for Sustainable Blue-bioeconomy Sesan Abiodun Aransiola, Abayomi Bamişaye, Olabisi Peter Abioye, Naga Raju Maddela, 2024-10-03 This volume comprehensively discusses marine bioprospecting and its applications in the marine bioeconomy specifically in clean energy generation and in biomedical industrial and agricultural sectors The advent of modern technology particularly advancements in deep sea exploration and biotechnology has enabled scientists to delve deeper into the ocean's depths and discover a treasure trove of unique organisms and compounds This demonstrates that the rich history of human interactions with the oceans is firmly ingrained in marine bioprospecting The blue economy which is a more accurate name for the systematic search for valuable substances and organisms in the water has gained popularity in recent years as a possible route for sustainable economic development One of the key driving factors behind marine bioprospecting is the growing realization that marine organisms possess unique biochemical compounds with the potential to revolutionize various industries These compounds include novel enzymes antimicrobial agents bioactive molecules and even potential pharmaceuticals Readers will learn about the applications of these discoveries in bioremediation wastewater treatment and biofuel production as well as the identification of natural
