Bacterial Growth and Lysis M.A. de Pedro, J.V. Høltje, Wolfgang Löffelhardt, 2013-11-11 This volume is based on a FEMS Symposium entitled Bacterial Growth and Lysis Metabolism and Structure of the Bacterial Sacculus held at the Monastery of Lluc Mallorca Spain on 5 10 April 1992 The goals of the

symposium were to assess the present state of knowledge on the structure and physiology of the bacterial murein sacculus and to develop new hypotheses and strategies to promote further development of the field. Consequently the contributions compiled in this volume include broadly different approaches from the introduction of new analytical methods to the presentation of provocative models for cell wall growth and division. Structural, biochemical and genetic aspects are widely covered with special emphasis on the enzymology and regulation of murein hydrolases and autolysins. Comprehensive reviews on bacterial S layers and yeast cell walls are included to stimulate conceptual cross feeding with these closely related topics. We believe that this book will provide the reader with a useful and up to date review of the topic. We would feel deeply rewarded by any positive influence this book may have on the future progress of the field whereby all the scientific credit for it should be given to the authors of the excellent contributions presented.

The Hermetic Millennia John C. Wright, 2012-12-24 The Hermetic Millennia by John C. Wright is a kaleidoscopic vision of future history and human evolution perfect for fans of hard sci-fi and space opera. Continuing from Count to a Trillion, Menelaus Illation, Montrose, Texas gunslinger idealist and posthuman genius has gone into cryo-suspension following the discovery that in 8 000 years a powerful alien intelligence will reach Earth to assess humanity's value as slaves. Montrose intends to be alive to meet that threat but he is awakened repeatedly throughout the centuries to confront the woes of an ever-changing and violent world witnessing millennia of change compressed into a few years of subjective time. The result is a breathtaking vision of future history like nothing before imagined: sweeping, tumultuous and evermore alien as Montrose's immortal enemies and former shipmates from the starship Hermetic harness the forces of evolution and social engineering to continuously reshape the Earth in their image, seeking to create a version of man the approaching slavers will find worthy.
