Wang,2020-02-29 Over the last decade there has been a growing interest in human behavior analysis motivated by societal needs such as security natural interfaces affective computing and assisted living However the accurate and non invasive detection and recognition of human behavior remain major challenges and the focus of many research efforts Traditionally in order to identify human behavior it is first necessary to continuously collect the readings of physical sensing devices e g camera GPS and RFID which can be worn on human bodies attached to objects or deployed in the environment Afterwards using recognition algorithms or classification models the behavior types can be identified so as to facilitate advanced applications Although such traditional approaches deliver satisfactory performance and are still widely used most of them are intrusive and require specific sensing devices raising issues such as privacy and deployment costs In this book we will present our latest findings on non invasive sensing and understanding of human behavior Specifically this book differs from existing literature in the following senses Firstly we focus on approaches that are based on non invasive sensing technologies including both sensor based and device free variants Secondly while most existing studies examine individual behaviors we will systematically elaborate on how to understand human behaviors of various granularities including not only individual level but also group level and community level behaviors Lastly we will discuss the most important scientific problems and open issues involved in human behavior analysis

Die Beitragsautoren des Tagungsbandes zum 6. Wissenschaftsforums Mobilität abgehalten im Mai 2014 an der Universität Duisburg-Essen diskutieren, welche Entscheidungen im Rahmen des Automobilmanagements, der Automobiltechnik, der Wertschöpfungskette und neuen Technologien sowie urbanen Mobilitätskonzepten notwendig sind, um den Übergang in die Elektromobilität zu bewältigen. Die Beiträge zeigen, dass der Übergang in die Elektromobilität Wissenschaft und Wirtschaft vor große Herausforderungen stellt. Es bedarf konsequenter und koordinierter Anstrengungen an den Schnittstellen der betriebswirtschaftlichen und ingenieurwissenschaftlichen Forschung.

Trabalho análogo à escravidão Vanessa Rosin Figueiredo, 2023-09-20. A obra investiga as origens sociais, filosóficas e físicas que levam à submissão do ser humano a condições análogas à escravidão, mas para além disso também traz diretrizes a seguir na busca de possíveis soluções aos problemas concretos identificados pela pesquisa. O trabalho em condições análogas à escravidão na sua pior forma, em que trabalhadores são reduzidos a condições degradantes e de privação de liberdade, atinge o direito mais elementar do ser humano, o de se autodeterminar. A privação de liberdade das mais diversas formas encontradas no fenômeno em estudo impacta na agenda existencial de cada indivíduo interrompendo ou mudando o curso de seu projeto de vida e caracteriza o dano existencial. Da violação aos direitos fundamentais advém o dever de reparar o dano causado e o principal desafio a obtenção da reparação justa e adequada do dano existencial diante de vários obstáculos que devem ser superados pelo trabalhador como o tabelamento dos danos imateriais, a onerosa carga probatória exigida e ainda o entendimento jurisprudencial equivocado quanto à caracterização do trabalho análogo à escravidão, situa-se enfrentadas na obra *Inteligência Artificial no Mercado de Trabalho* Charize de O. Hortmann, 2020-12-01. O livro escrito originalmente como uma dissertação de mestrado busca trazer os principais efeitos da 4ª revolução tecnológica e por conseguinte das tecnologias disruptivas perante os principais direitos humanos e sociais. Trazendo à tona certas verdades inconvenientes sobre o futuro do trabalho e da sociedade como um todo, a obra se propõe a apresentar soluções criativas para as rápidas mudanças que vêm acontecendo globalmente. *Children's Books in Print, 2007*, 2006 **Mit Innovationsmanagement zu Industrie 4.0** Peter Granig, Erich Hartlieb, Bernhard Heiden, 2018-07-30.
