Practical Handbook of Environmental Site Characterization and Ground-Water Monitoring David M. Nielsen, 2005-09-28 Published in 1991 the first edition of The Practical Handbook of Ground Water Monitoring quickly became the gold standard reference on the topic of ground water monitoring But as in all rapidly evolving fields regulations change technology advances methods improve and research reveals flaws in prior thinking As a consequence books that document the state of the science even widely acknowledged definitive works become outdated and need to be rewritten periodically to stay current Reflecting this and renamed to highlight its wider scope The Practical Handbook of Environmental Site Characterization and Ground Water Monitoring Second Edition provides an updated look at the field Completely revised the book contains so much new information that it has doubled in size Containing the most up to date information available this second edition emphasizes the practical application of current technology It covers environmental site characterization and ground water monitoring in great detail from the federal regulations that govern environmental investigations to the various direct and indirect methods of investigating and monitoring the subsurface to the analysis and interpretation of complex sets of environmental data Cheaper better faster was the mantra of the 1990s resulting in more streamlined approaches to both environmental site characterization and ground water monitoring but also pitting the application of good science against the mandate to get a project done as quickly and inexpensively as possible This book provides unbiased technical discussions of the tremendously powerful tools developed in the last decade helping environmental professionals strike a balance between good science and economics

Construction Management Eugenio Pellicer, Víctor Yepes, José C. Teixeira, Helder P. Moura, Joaquín Catalá, 2013-10-09 The management of construction projects is a wide ranging and challenging discipline in an increasingly international industry facing continual challenges and demands for improvements in safety in quality and cost control and in the avoidance of contractual disputes Construction Management grew out of a Leonardo da Vinci project to develop a series of Common Learning Outcomes for European Managers in Construction Financed by the European Union the project aimed to develop a library of basic materials for developing construction management skills for use in a pan European context Focused exclusively on the management of the construction phase of a building project from the contractor's point of view Construction Management covers the complete range of topics of which mastery is required by the construction management professional for the effective delivery of new construction projects With the continued internationalisation of the construction industry Construction Management will be required reading for undergraduate and postgraduate students across Europe

Durability of Post-tensioning Tendons

fib Fédération internationale du béton, 2001-01-01 In some countries durability problems with post tensioning tendons have in the past led to fairly restrictive regulations Improvements to execution procedures have been developed since and new or improved prestressing systems have been proposed too This development was of course subject of discussions in fib Commission 9 Reinforcing and Prestressing Materials and Systems and in IABSE Working Commission 3 Concrete Structures It was decided to organise a workshop with the aim to review the different aspects of the problems encountered and to discuss solutions available today Keynote speakers from various countries were invited to contribute Their papers are published in this bulletin grouped together under the following themes

- Inventory and condition 6 papers
- Investigation and repair 5 papers
- Technical progress 4 papers
- Strategies for improvement 6 papers

Supported by the international federation for structural concrete fib and the international association for bridge and structural engineering IABSE the workshop took

place on 15 16 November 2001 at Ghent University celebrating the 75th anniversary of the Magnel Laboratory for Concrete Research whose director also chaired the Scientific Committee and edited the bulletin It needs to be emphasised that in the bulletin invited experts present their individual views Although not yet discussed in any of the association s working bodies the highly topical contents of the bulletin is believed to be of general interest to fib s members and to document a starting point for future work in this field Therefore the Council of fib agreed to exceptionally publish these papers within fib s series of Bulletins Golden Gate National Recreation Area (N.R.A.), Marin Headlands and Fort Baker Transportation
