Machine Art in the Twentieth Century Andreas Broeckmann, 2016-12-16 An investigation of artists engagement with technical systems tracing art historical lineages that connect works of different periods Machine art is neither a movement nor a genre but encompasses diverse ways in which artists engage with technical systems In this book Andreas Broeckmann examines a variety of twentieth and early twenty first century artworks that articulate people s relationships with machines In the course of his investigation Broeckmann traces historical lineages that connect art of different periods looking for continuities that link works from the end of the century to developments in the 1950s and 1960s and to works by avant garde artists in the 1910s and 1920s An art historical perspective he argues might change our views of recent works that seem to be driven by new media technologies but that in fact continue a century old artistic exploration Broeckmann investigates critical aspects of machine aesthetics that characterized machine art until the 1960s and then turns to specific domains of artistic engagement with technology algorithms and machine autonomy looking in particular at the work of the Canadian artist David Rokeby vision and image and the advent of technical imaging and the human body using the work of the Australian artist Stelarc as an entry point to art that couples the machine to the body mechanically or cybernetically Finally Broeckmann argues that systems thinking and ecology have brought about a fundamental shift in the meaning of technology which has brought with it a rethinking of human subjectivity He examines a range of artworks including those by the Japanese artist Seiko Mikami whose work exemplifies the shift

Empire De/Centered Maxim Waldstein, Sanna

Turoma, 2016-05-06 In 1991 the Soviet empire collapsed at a stroke throwing the certainties of the Cold War world into flux Yet despite the dramatic end of this last empire the idea of empire is still alive and well its language and concepts feeding into public debate and academic research Bringing together a multidisciplinary and international group of authors to study Soviet society and culture through the categories empire and space this collection demonstrates the enduring legacy of empire with regard to Russia whose history has been marked by a particularly close and ambiguous relationship between nation and empire building and between national and imperial identities Parallel with this discussion of empire the volume also highlights the centrality of geographical space and spatial imaginings in Russian and Soviet intellectual traditions and social practices underlining how Russia s vast geographical dimensions have profoundly informed Russia s state and nation building both in practice and concept Combining concepts of space and empire the collection offers a reconsideration of Soviet imperial legacy by studying its cultural and societal underpinnings from previously unexplored perspectives In so doing it provides a reconceptualization of the theoretical and methodological foundations of contemporary imperial and spatial studies through the example of the experience provided by Soviet society and culture

Bernd Herzogenrath, 2009-05-05 This volume presents an original and in depth study devoted to the discussion and relevance of the notion of the environment and ecology within the frame work and ontology of the philosophy of Gilles Deleuze and Félix Guattari Their non dualist and materialist re thinking of these issues is analyzed from various positions within Cultural Studies and the Sciences Thinking Environment s with Deleuze Guattari is thus far removed from what might be termed intellectual tree hugging it is a call to think complexity and to complex thinking a way to think the environment and environments as negotiations of human and nonhuman dynamics Such a thinking by default carefully evades Cartesian dualisms such as nature versus culture biology versus technology or natural versus artificial At a time when the distinctions as well as the transitions between nature and culture are getting more and more fluid Deleuze Guattari s alliance with environmental thinking turns out to be a rather fruitful exciting and likely one one that allows for a single mode of articulating environmental evolutionary and technological registers and relations and for the conceptualization of a general non anthropocentric ecoscience This book thus aims at a radical re thinking of these concepts from a Deleuzian Guattarian i e non dualist and materialist perspective
