*Representations of Art and Art Museums in Children's Picture Books* Perry Nodelman,2024-10-17 What happens when the assumptions and practices of museum curators and art educators intersect with the assumptions and practices of publishing for children This study explores how over three hundred children s picture books most of them published in the last three decades in English introduce children to art and art museums It considers how the books emerge from and relate to a range of theories and assumptions about childhood and childhood development children s literature and culture illustration visual art museology and art education As well as examining how these theories and assumptions influence what picture books teach young readers about visiting museums and about how to look at and think about art it examines which artists and artworks appear most often in picture books and offers a survey of different kinds of art related picture books ones that claim to be purely informational ones that make looking at art a game or a puzzle ones in which children visit art museums and many more Since the books all include reproductions of or allusions to museum artworks the study also considers the problems illustrators face in depicting museum artworks in illustrations in a different style

*The Value of Drawing Instruction in the Visual Arts and Across Curricula* Seymour Simmons III,2021-03-29 By applying

philosophical and historical perspectives to drawing instruction this volume demonstrates how diverse teaching methods contribute to cognitive and holistic development applicable within and beyond the visual arts Offering a new perspective on the art and science of drawing this text reveals the often unrecognized benefits that drawing can have on the human mind and thus argues for the importance of drawing instruction despite and even due to contemporary digitalization Given the predominance of visual information and digital media visual thinking in and through drawing may be an essential skill for the future As such the book counters recent declines in drawing instruction to propose five Paradigms for teaching drawing as design as seeing as experience and experiment as expression and as a visual language with exemplary curricula for pre K12 art and general education pre professional programs across the visual arts and continuing education With the aid of instructional examples this volume dispels the misconception of drawing as a talent reserved for the artistically gifted and posits it as a teachable skill that can be learned by all This text will be of primary interest to researchers scholars and doctoral students with interests in drawing theory and practice cognition in the arts positive psychology creativity theory as well as the philosophy and history of arts education Aligning with contemporary trends such as Design Thinking STEAM and Graphicacy the text will also have appeal to visual arts educators at all levels and other educators involved in arts integration
