Intrapreneurship Management Rainer Hasenauer, Oliver Yu, 2024-06-17 Develop and deploy industry-leading ideas with this groundbreaking management toolkit. The universal modern image of an innovator is a technological entrepreneur who conceives and develops their groundbreaking ideas outside an existing institution and only subsequently builds infrastructure around it. In reality, however, the bulk of technological innovation comes through Intrapreneurship innovation that takes place inside an existing organization, taking advantage of the institutional support and economies of scale provided by continuing enterprises. Intrapreneurship Management is an approach that cultivates these internal innovations and the knowledge workers who produce them. Intrapreneurship Management: Concepts, Methods, and Software for Managing Technological Innovation in Organizations offers a guide to this approach, its challenges, and its rewards. Beginning with a simple yet flexible definition of innovation—an idea implemented with impact—it analyzes the processes and organizational tools by which novel ideas can be fostered, supported, and applied, producing industry-leading firms that maximize their internal talent. It also provides access and tools for using Intrapreneurship READINESS Navigator (IRN), a unique software already deployed successfully in over 150 innovation projects. Intrapreneurship Management readers will also find case studies of technological innovations within a range of organizations. A look forward to future challenges facing innovative organizations in the 21st century. Detailed treatment of subjects including innovation, marketing, systematic creativity, and developing innovative organizational culture. Intrapreneurship Management is ideal for intrapreneurs, their managers, and any professionals working in industries driven by technological innovation, as well as researchers and students of management. **Arts Therapies in Schools** Vassiliki Karkou, 2010 This book outlines the potential uses of music, art, drama, and dance movement therapies in educational settings and the contribution they have to make to the emotional and social development of children and adolescents. Drawing on

international evidence the book outlines a wide range of applications of arts therapies across a range of settings

Psychopharmacology Handbook for the Non Medically Trained Sophia Dziegielewski, 2006-08-08 In today's era of managed behavioral health care mental health professionals are called upon to consult on medication treatment or recommend what medications would best serve as adjuncts to therapy. Medically trained or not, all mental health professionals need to know as much as possible about psychopharmacologic medications from dosage and side effects to drug-drug interactions and other special considerations in order to provide effective and accountable treatment. The first ever handbook of its kind, Psychopharmacology Handbook for the Non Medically Trained fills a noticeable gap in most student training programs by providing a reader-friendly and accessible overview of the role of drugs in mental health treatment. Emphasizing the importance of making medications available to consumers in conjunction with the most effective and efficient counseling interventions, Dziegielewski establishes the context for the therapeutic use of psychotropic drugs in the culture of today's mental health treatments, examines the danger of the quick-fix mentality into which consumers and clinicians are tempted to fall, and then focuses on the medications themselves. One of the most prominent and authoritative social work academics today, Dziegielewski is an authority on the topic of psychopharmacology in social work practice. The recipient of numerous honors and awards for her teaching, the creator of a popular preparation course for social work licensure, and the author of over 95 publications, she is a source to which students and professionals turn for up-to-date, accurate information on a variety of topics in the social work field. Psychopharmacology Handbook for the Non Medically Trained is an invaluable resource guide for all non-medically trained practitioners, providing therapists, social workers, and other counselors with effective tools and critical information to help them become better informed about all courses of mental health treatment for their clients.

Sustainability on University Campuses: Learning, Skills Building and Best Practices Walter Leal Filho, Ugo Bardi, 2019-06-03 The implementation of sustainability initiatives on campuses is an essential component of promoting sustainability in the higher education context. In addition to reflecting an awareness of environmental issues, campus programmes demonstrate how seriously universities take sustainability at the institutional level. There is a lack of truly interdisciplinary publications that comprehensively address the issue of campus greening, and there is an even greater need for publications that do so at a truly international level. This book meets these needs. It is one of the outcomes of the Second Symposium on Sustainability in University Campuses, SSUC 2018, which was jointly organised by the University of Florence, Italy; Manchester Metropolitan University, UK; the Research and Transfer Centre Sustainable Development and Climate Change Management; and the European School of Sustainability Science and Research at the Hamburg University of Applied Sciences, Germany, in cooperation with the Inter-University Sustainable Development Research Programme, IUSDRP. The book showcases examples of campus-based research and teaching projects: regenerative campus design, low-carbon and zero-carbon buildings, waste prevention, and resilient transport, among others. Ultimately, it

demonstrates the role of campuses as platforms for transformative social learning and research and explores the means by which university campuses can be made more sustainable The aims of this publication are as follows to provide universities with essential information on campus greening and sustainable campus development initiatives from around the world to share ideas and lessons learned in the course of research teaching and projects on campus greening and design especially successful initiatives and good practice and to introduce methodological approaches and projects intended to integrate the topic of sustainable development in campus design and operations This book gathers contributions from researchers and practitioners in the field of campus greening and sustainable development in the widest sense from business and economics to the arts administration and the environment and hailing from Europe Latin America North America and Asia *Problem Solving ... a Basic Mathematics Goal* Steven P. Meiring,1981 *Breaking Free of Managed Care* Dana C.
