Pallagst, 2012-11-28 Urban sprawl is one of the key planning issues facing many US cities leading to the creation and adoption of a variety of approaches to control growth However many growth management ideas do not align well with the growth promoting planning traditions of the US which historically have been dominated by the concerns of the market the landowner and the developer Illustrated by a study of the San Francisco Bay Area this book puts forward an innovative theoretical approach to growth management analyzing it as a tool for controlling land use expansion in the US This region makes a particularly useful study as it has encountered long term growth pressures complex land use demands and the application of a wide variety of growth management approaches over the past few decades Using empirical qualitative analysis the book examines which growth management activities have actually been put into practice and which have proved successful and questions how such a planning approach functions in today's complex and multi faceted planning paradigms It concludes by stressing the different notions of interdependence in growth management regional interdependence interdependence between stakeholders and interdependence in planning theory *Collaborative Land Use Management*

Growth Management and Affordable Housing Anthony Downs, 2004-06-15 Advocates of growth management and smart growth often propose policies that raise housing prices thereby making housing less affordable to many households trying to buy or rent homes Such policies include urban growth boundaries zoning restrictions on multi family housing utility district lines building permit caps and even construction moratoria Does this mean there is an inherent conflict between growth management and smart growth on the one hand and creating more affordable housing on the other Or can growth management and smart growth promote policies that help increase the supply of affordable housing These issues are critical

to the future of affordable housing because so many local communities are adopting various forms of growth management or smart growth in response to growth related problems Those problems include rising traffic congestion the absorption of open space by new subdivisions and higher taxes to pay for new infrastructures This book explores the relationship between growth management and smart growth and affordable housing in depth It draws from material presented at a symposium on these subjects held at the Brookings Institution in May 2003 sponsored by the U S Department of Housing and Urban Development the National Association of Realtors and the Fannie Mae Foundation Contributors seek to inform the debate and provide some useful answers to help the nation accommodate the curtailment of growth in urban and suburban domains while still ensuring a supply of affordable housing Contributors include Karen Destorel Brown Brookings Robert Burchell Rutgers University Daniel Carlson University of Washington David L Crawford Econsult Corporation Anthony Downs Brookings Ingrid Gould Ellen New York University William Fischel Dartmouth College George C Galster Wayne State University Jill Khadduri Abt Associates Gerrit J Knaap University of Maryland Robert Lang Virginia Polytechnic

Towards Sustainable Cities Peter J. Marcotullio, 2017-09-08 While there has been much recent research into achieving sustainability in urban areas most of this is specific to a particular region This volume broadens these discussions by extending the analysis from North American and European cities to include East Asian cities Many cities in Asia have deep historical roots have sustained dense populations through time and have grown prosperous in recent decades They also face significant environmental degradation and other planning challenges In bringing together and comparing strategies and experiences from three distinct global regions this book offers unique insights and new perspectives on the challenges of moving towards greater urban sustainability While questioning which strategies can promote sustainable cities in a global context the book also illustrates that while formulae generated out of American and European experience cannot be universally applied some of the analytical approaches and experience of the other developed countries can offer insights for those working in different contexts It argues that managing urban change for greater urban sustainability in diverse regions requires detailed understanding of local issues and regional strategies as well as strong support from local communities

Urban Sustainability through Smart Growth Yonn Dierwechter, 2017-02-24 This book investigates the new urban geographies of smart metropolitan regionalism across the Greater Seattle area and examines the relationship between smart growth planning strategies and spaces of work home and mobility The book specifically explores Seattle within the wider space economy and multi scaled policy regime of the Puget Sound region as a whole jumping up from questions of city politics to concerns with what the book interprets as the intercurrency of city regional ordering These theoretical terms capture the state progressive effort to promote smarter forms of regional development but also the societal institutional tensions and outright contradictions that such urban development invariably entails particularly around problems of social equity Key organizing themes in the text include the historical path dependencies of uneven economic and social development particularly between Tacoma Pierce County and Seattle King County current patterns of high wage medium wage and low wage jobs the emerging spatial and social structure of recent residential changes especially with respect to class and race composition and finally transit trends and new urban spaces associated with policy efforts to mitigate highway congestion and car dependency Greater Seattle then is mapped as a key US urban region inscribed spatially by the uneven search for a more sustainable order Historically sensitive theoretically informed and empirically topical this book is of interest to scholars and students at all levels in regional planning urban geography political science sustainability studies urban sociology and public policy
