Routledge Library Editions: World War II in Asia Timothy Hall, John J. Sbrega, 2021-03-11 The 4 volumes in this set, originally published between 1980 and 1983, bring to light and focus on the conflict between Japan and Australia and Japan and the USA. Timothy Hall's volumes are richly illustrated with black and white photographs, used highly contentious documents as their sources, and give fascinating insights into a period of Australian history which is sometimes less than glorious. John J. Sbrega's tour de force is not only one of the most extensive annotated bibliographies on the USA and Japan in World War 2 ever published, but it also provides invaluable information on lesser-known but no less important aspects of the conflict.

US Marine Corps Handbook 1941-45 George Forty, 2006-09-21 Employing a range of archive black and white photographs, this book examines the US Marine Corps organisation and command structure, strategy, tactics and amphibious assault doctrine. Providing biographies of its most influential figures, it also surveys insignia, uniforms and equipment to provide a portrait of the US Marine Corps at war. *Ultimate Allied Fighters of the Second World War* Justo Miranda, 2024-01-07 During the five years of the Second World War, the power of engines and speed of aircraft increased as much as it did during twenty years of peacetime. Conventional aircraft and engines reached the limits marked in the original design and surpassed them very fast. The basis for this huge achievement was exotic fuels, short-lived, artificially overpowered engines, propellers with four, five and even six blades, and thinner wings with special sections of laminar flow. Then the faster Allied fighters began to be attacked by a demon that lived in the air: scientists called it compressibility buffeting, and different types of aircraft suffered it at different speeds and manifested itself in different ways. The American and British designers never understood the true causes behind the aerodynamic phenomenon. They were forced to adopt brute force solutions by increasing engine power on the turbojet-powered fighters, leaving in the background the research on the last projects of

fighters driven by monster piston engines The purpose of this book is to present them to the public for its notable interest

Churchill's Eagles Richard Mead, 2025-11-04 offers a critical perspective on how the socialization of RAF officers in public schools influenced the force's operational culture Mead provides compelling evidence that while the system produced leaders of character and discipline it could also stifle innovation with consequences that reverberated throughout the RAF's wartime efforts The Journal of the Air Force Historical Foundation The RAF did not come of age until the Second World War The role of its forerunners in the Great War the Royal Flying Corps and the Royal Naval Air Service although important was peripheral to that of the ground forces The founding father of the RAF Lord Trenchard was determined that it should become a fully fledged third service equal in status to the Royal Navy and British Army and this he succeeded in doing between the wars firstly by setting up the RAF College at Cranwell and Staff College at Andover and secondly by providing a cost effective policeman of the more rebellious parts of the British Empire By 1939 the RAF had grown substantially but of the three best aircraft of the coming War only the Supermarine Spitfire was in service as neither the Avro Lancaster nor the De Havilland Mosquito would be available until early 1942 Aircraft however were not enough It was the leaders of the RAF the subjects of this book who would take the battle to the enemy and who after six long years would prevail
