Sleep Disorders Henry Kellerman, 1981 **Sleep Disorders in Selected Psychiatric Settings** Imran S.
Khawaja, Thomas D. Hurwitz, 2021-01-19 According to research more than 50% of patients seen in psychiatric clinics have
sleep problems Despite this fact there is a lack of sleep medicine training in psychiatric residency programs especially for
disorders like insomnia and sleep related problems in women and children Also there is a lack of education on treating sleep
problems in special situations like ICU settings or managing sleep problems via telemedicine Sleep physicians on the other
hand are uncomfortable treating patients with the psychiatric disorders particularly in this demographic Pediatricians are
also not trained to work with children suffering from sleep disturbances or psychiatric disorders They often struggle to
correctly identify a particular disorder and lack confidence to adequately treat and manage these issues In total there are
only about 250 clinicians trained in both sleep medicine and psychiatry despite the millions of patients who could benefit
from both disciplines While Springer does have a forthcoming text on sleep and psychiatric disturbances that addresses
comorbid sleep disorders in the general population there is still no resource that examines the intricacies of insomnia in
women and children This text highlights the importance of common medical comorbidities and illuminates the salient points
for treatment diagnosis and management of these conditions as they relate particularly to these special populations Written
by experts in both sleep medicine and psychiatry the text takes a cutting edge reader friendly approach to topics that include

sleep disturbances in pregnancy sleep tele medicine sleep disturbances related to difficulties in schools and substance induced disturbances Each chapter follows a consistent format making it an excellent tool for the busy clinician who is not able to sift through scientific literature or didactic texts Psychiatric Sleep Disorders in Women and Children is an excellent resource for all clinicians who may work with special populations struggling with sleep and psychiatric comorbidities including psychiatrists sleep medicine physicians internists primary care and family medicine physicians pediatricians obstetrics gynecologists psychologists and others
